Glorieta Pass P. G. Nagle 2000-05-15 It's called the "Gettysburg of the West," the battle for control of Glorieta Pass, near Santa Fe. At stake is a route to Colorado's gold and San Francisco's unblockadable sea coast, two goals that would give the Confederate States a vital edge. General H.H. Sibley's Texas Confederates are opposed by a Union army under Colonel E.R.S. Canby. Before the war, Sibley and Candby were on the same side. Now there's just no winning in this bloody battle between countrymen torn apart by money, politics, and geography. History will ignore the fate of Lieutenant Franklin of New York, Captain O'Brien of the Colorado Volunteers, Jamie Russell of San Antonio, and Miss Laura Howland, recently arrived from Boston. They will be utterly changed, however, in the cauldron of battle where the fate of Glorieta Pass--and hundreds of lives--is decided.

Yeshiva Fundamentalism Nurit Stadler 2009-01-01 2009 Choice Outstanding Academic Title The ultra-Orthodox yeshiva, or Jewish seminary, is a space reserved for men, and for a focus on religious ideals. Fundamentalist forms of piety are usually believed to be quite resistant to change. In *Yeshiva Fundamentalism*, Nurit Stadler uncovers surprising evidence that firmly religious and pious young men of this community are seeking to change their institutions to incorporate several key dimensions of the secular world: a redefinition of masculinity along with a transformation of the family, and participation in civic society through the labor market, the army, and the construction of organizations that aid terror victims. In their private thoughts and sometimes public actions, they are resisting the demands placed on them to reject all aspects of the secular world. Because women are not allowed in the yeshiva setting, Stadler's research methods had to be creative. She invented a way to simulate yeshiva learning with young yeshiva men by first studying with an informant to learn key religious texts, often having to do with family life, sexuality, or participation in the larger society. This informant then invited students over to discuss these texts with Stadler and himself outside of the yeshiva setting. This strategy enabled Stadler to gain access to aspects of yeshiva life in which a woman is usually unable to participate, and to hear "unofficial" thoughts and reactions which would have been suppressed had the interviews taken place within the yeshiva.

Yeshiva Fundamentalism provides an intriguing — and at times surprising — glimpse inside the all-male world of the ultra-orthodox yeshivas in Israel, while providing insights relevant to the larger context of transformations of fundamentalism worldwide. While there has been much research into how contemporary feminism has influenced the study of fundamentalist groups worldwide, little work has focused on ultra-Orthodox men's desires to change, as Stadler does here, showing how fundamentalist men are themselves involved in the formulation of new meanings of piety, gender, modernity and relations with the Israeli state.

Resurrecting Knives Vincent De Souza 2009 The knives are out. Poetry declares hand-to-hand guerrilla war on conservative aesthetics, political correctness and boundaries imposed on art. In Resurrecting Knives De Souza dissects the conventional anatomy of the poem and fashions a new set of intellectual, technical and visual dynamics. Where the American Beat writing experimentalists put work to the sword, randomly cutting up and reforming statements into patchwork poetics - this writing takes on the idea and develops it into a method for strategically cutting into the body of the poem to allow for the insertion of different textures of language and thought. Without resorting to bludgeoning or violence, the author deftly applies a surgical scalpel to make neat cuts around titles or stanzas and into these virtual spaces flow lifeblood of diary entry, film scene descriptions and poetic theory grafted effortlessly into the poem. A meditation on the nature of human violence dovetails into the climactic hall of mirrors combat scene of Bruce Lee in Enter The Dragon! A contemplation on the design of the Bowie knife cuts dramatically into a motorcycle gang's knife skill contest in The Loveless! The poem narrator's regret of hurling fiery verbal abuse suddenly slices into the scene-set with Clint Eastwood directing his gunslinger's stare before shooting down murderous bandits in A Fistful of Dollars. This use of what De Souza describes as the "cut-in technique" is evident in poetry throughout this very adventurous second collection. At the same time, these experiments sit alongside an equally potent set of more conventional poems which continue to explore his favoured themes of the loss of childhood innocence, English landscape, the corrupt nature of business culture and the hedonistic intensity of London.

Roulette, Breaking the Bank and Winning Monster Peter Zhang 2016-04-21 Roulette game has been around for centuries and yet gamblers have gone broke just over 2.7% house edge. Now you may laugh at me and comment that I am losing 2.7% at every spin

cumulatively. Of course you are right in saying that and you may tell me that it is highly negative expected value in the long run. But can you ignore these facts Roulette will produce winning and losing streaks Roulette will allow gamblers to win big by giving them 36 times of whatever they put straight up If a person goes hot and gets 2 times a number correct he stands to win 36*36 times the amount bet consecutively. Giving you returns of 1296 times or if you just bet 25 dollars which anyone can afford to lose in a casino he will have won 32 thousand 400 dollars or \$32,400. Now with such low house edges anyone can go on a hot streak, but everyone loses. And now if I tell you I have a system that will allow you to take shots at the game of Roulette and if you win you compound your profits and cut losses and take profits then certainly the casinos will a lot fun, a lot entertainment and a hell lot more fun, then would you deny it? In this manual and in the coming pages I am going to convey to you the secrets of my winning system of Roulette, every Roulette player must read this book at least one and what have you got to lose? You are just going to get saved a lot of money and this is an indispensable guide to winning in casinos a cart full of money, all crisp 100 dollar bundles. And who knows you may even break the bank at roulette table. A lot of players go to the casinos and assume they are lucky and going to win and this is the wrong mentality to win at poker, because if you believe you are going to win you are going to compound your losses following bad strategies like Martingale. The Martingale strategy works best for the casino and they prevent losses by limiting the maximum amount of bets that could be placed and of course players like you and me don't have access to infinite resources that will allow us to keep doubling our bets forever. We need to win big and we need to win with a small amount of money. In this manual I am going to give you solid advice that will allow players to reduce the house edge of casinos and who knows if everyone read my book probably the casinos will stop the game of Roulette altogether. Because I have a system that really does beat the casinos. And the rules which I will tell you precisely in later part of the book are as follows 1.Take Profits 2.Try to go on a hot streak 3.Cut losses 4.Go for big wins like betting straight up 5.An intuitive pattern

recognition system that makes phrases out of meaningless numbers for identification of wheel bias. (This works on every Roulette Wheel in Vegas, Atlantic City, every casino in the world and all machines open and closed and even automatic Roulette machines which have a ball inside a chamber) This is a short book that will give you the right tools to approach the game of Roulette and every chapter will convey the topics that I have told you above and you must use all of these tools at once so that you will make big money or be break-even or have very little losses in the game of Roulette. Good Luck and wish you a lot of fun and entertainment in the casinos."

NurtureShock Po Bronson 2009-09-03 In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language?

NurtureShock is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

Stumbling on Happiness Daniel Gilbert 2009-02-24 A smart and funny book by a prominent Harvard psychologist, which uses groundbreaking research and (often hilarious) anecdotes to show us why we're so lousy at predicting what will make us happy - and what we can do about it. Most of us spend our lives steering ourselves toward the best of all possible futures, only to find that tomorrow rarely turns out as we had expected. Why? As Harvard psychologist Daniel Gilbert explains, when people try to imagine what the future will hold, they make some basic and consistent mistakes. Just as memory plays tricks on us when we try to look backward in time, so does imagination play tricks when we try to look forward. Using cutting-edge research, much of it original, Gilbert shakes, cajoles, persuades, tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was. Among the unexpected questions he poses: Why are conjoined twins no less happy than the general population? When you go out to eat, is it better to order your

favourite dish every time, or to try something new? If Ingrid Bergman hadn't gotten on the plane at the end of Casablanca, would she and Bogey have been better off? Smart, witty, accessible and laugh-out-loud funny, *Stumbling on Happiness* brilliantly describes all that science has to tell us about the uniquely human ability to envision the future, and how likely we are to enjoy it when we get there.

The Psychology of Fake News Rainer Greifeneder 2020-08-13 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers

his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Elementary Probability for Applications Rick Durrett 2009-07-31 This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.

The 9/11 Commission Report National Commission on Terrorist Attacks

upon the United States 2004 Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks. *Rest Stop* Ron Lemco 2011-10-18 Synopsis *Rest Stop* is a 250 page realistic novel based on real characters I knew while I served my time in prison. It is about the convicts I lived with on a daily basis. The book starts off in prison and gives insight of the living conditions. It tells of the games that are needed in order to survive. It explains the brotherhood that forms between cell mates and the cliques you become part of, not by choice but out of necessity. Following a fight and a stabbing, the four inmates who are held responsible are being transported from a minimum security location to the main prison when they escape. The escape convicts come up with a plan to take over a rest-area on Interstate 15. It was just a few miles from Las Vegas. They figured that the people going to Vegas would have lots of cash on them. Their plan was to rob them and use the money to get out of the country. It is a long way from Oregon State Penitentiary to Las Vegas. A big part of the story takes place on the trip to get to the rest stop, with robbery, murder and rape along the way. The driving force behind the story is the dialog and vivid thought process, not only from the convicts but from the victims. Each chapter gives insight to the mind set and words of the escaped convicts, along with the Warden, the State Police and the Federal agent who is always just one step behind the inmates. The novel begins with a thrilling, fast paced opening. It holds the excited pace up to an unforgettably tense conclusion. Each chapter ends in a poem I wrote while in prison and coincides with the story. The epilogue leaves room for a sequel for a second book. Neon Metropolis Hal Rothman 2002 First published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

I Am a Monument Aron Vinegar 2008 Learning from Las Vegas, originally published by the MIT Press in 1972, was one of the most influential and controversial architectural books of its era. Thirty-five years later, it remains a perennial bestseller and a definitive theoretical text. Its authors—architects Robert Venturi, Denise Scott Brown, and Steven Izenour—famously used the Las Vegas Strip to argue the virtues of

the "ordinary and ugly" above the "heroic and original" qualities of architectural modernism. Learning from Las Vegas not only moved architecture to the center of cultural debates, it changed our ideas about what architecture was and could be. In this provocative rereading of an iconic text, Aron Vinegar argues that Learning from Las Vegas is not only of historical interest but of absolute relevance to current critical debates in architectural and visual culture. Vinegar argues that to read Learning from Las Vegas only as an exemplary postmodernist text—to understand it, for example, as a call for pastiche or as ironic provocation—is to underestimate its deeper critical and ethical meaning, and to miss the underlying dialectic between skepticism and the ordinary, expression and the deadpan, that runs through the text. Vinegar's close attention to the graphic design of Learning from Las Vegas, and his fresh interpretations of now canonical images from the book such as the Duck, the Decorated Shed, and the "recommendation for a monument," make his book unique. Perhaps most revealing is his close analysis of the differences between the first 1972 edition, designed for the MIT Press by Muriel Cooper, and the "revised" edition of 1977, which was radically stripped down and largely redesigned by Denise Scott Brown. The dialogue between the two editions continues with this book, where for the first time the two versions of Learning from Las Vegas are read comparatively.

Debating Vietnam Joseph A. Fry 2006 In the midst of the Vietnam War, two titans of the Senate, J. William Fulbright and John C. Stennis, held public hearings to debate the conflict's future. Their shared aim was to alter the Johnson administration's strategy and bring an end to the

war—but from dramatically different perspectives. In this intriguing new work, historian Joseph A. Fry provides the first comparative analysis of the inquiries and the senior southern Senators who led them.

The Eudaemonic Pie Thomas A. Bass 1985 Recounts the true story of a group of young computer wizards who set out to beat the system at Las Vegas by means of mathematical theory and computers, small enough to be hidden in shoes, that communicate with each other by radio and body sensors

A Short History of Las Vegas Barbara Land 2004-03 Today's Las Vegas welcomes 35 million visitors a year and reigns as the world's premier gaming mecca. But it is much more than a gambling paradise. In *A Short History of Las Vegas*, Barbara and Myrick Land reveal a fascinating history beyond the mobsters, casinos, and showgirls. The authors present a complete story, beginning with southern Nevada's indigenous peoples and the earliest explorers to the first pioneers to settle in the area; from the importance of the railroad and the construction of Hoover Dam to the arrival of the Mob after World War II; from the first isolated resorts to appear in the dusty desert to the upscale, extravagant theme resorts of today. Las Vegas—and its history—is full of surprises. The second edition of this lively history includes details of the latest developments and describes the growing anticipation surrounding the Las Vegas centennial celebration in 2005. New chapters focus on the recent implosions of famous old structures and the construction of glamorous new developments, headline-making mergers and multibillion-dollar deals involving famous Strip properties, and a concluding look at what life is like for the nearly two million residents who call Las Vegas home.
