Irishness and Womanhood in Nineteenth-century British Writing Thomas J. Tracy 2009 Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

Motorcycle Electrical Systems Tracy Martin A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

**The Tiddler Invasion** Floyd Orr 2013-06-29 This is the book collectors, restorers, and nostalgic fans of the machines of our youth have been waiting to arrive! After years of extensive research through archives of motorcycle magazines, books, and brochures from the classic era, the founder of the seminal Tiddlerosis website has published his magnum opus on the subject. The Tiddler Invasion covers many miles of two-wheeled motorized nostalgia. Thousands of facts, figures, colors, specifications, and even original prices are packed

into more than 600 detailed pages. The story of the invasion of the USA by small motorcycles and scooters in the 1955-1975 era is told with enthusiasm for these many wondrous little machines by someone who lived through that special time in our nation's history. The book includes approximately 180 charts of the popular models sold in the U.S. during the period and well over 400 B&W photos. The author and two major collectors of these special little bikes share nostalgic personal remembrances of a wondrous time past. The focus of *The Tiddler Invasion* is on the most common machines of the period, mostly from Japan. Honda, Yamaha, Kawasaki, and Suzuki each have a detailed chapter. Bridgestone, Hodaka, Tohatsu, and other early brands share a chapter. The story basically begins with the arrival of the Honda 50 in 1959 and ends with the release of the Gold Wing in 1975. The tiddler era rose to prominence in the Sixties and began its slow descent into obscurity as the Kawasaki Mach III, the Honda 750 Four, and the Kawasaki Z-1 took over the U.S. motorcycle market. The major brands from the USA are detailed in a chapter, too. This group is of course dominated by Harley-Davidson, Allstate, and Cushman, just as it was back then. There are no H-D Big Twins here, but plenty of Hummers, Toppers, Super Eagles, Mopeds and Twingles! There were countless European brands and models imported in the Sixties, but only those of significance are included. As we all know, most of the European models were either large road burners, obscure small Italian bikes and scooters, or off-road competition machines. You will not find Nortons, Guzzis, Maicos or Parillas here, but the European chapter is quite sizable nonetheless. The most difficult element to communicate to a prospective reader is the definition of the machines and parameters included in this book. The concept of *The Tiddler Invasion* is unique to the time and place. Although the 50cc machines began Americans' rush to motorcycle dealerships, the market rapidly expanded from that point. The

smallest machines covered in the book are the true tiddlers, but these little putt-putts for kids comprised only the tip of the iceberg. Many classic 250cc sports machines such as the Ducati Diana, Harley-Davidson Sprint H, Honda Hawk, Yamaha YDS-2, Suzuki X-6, and Bultaco Metralla roar through the pages of this book! The Kawasaki Triples scream through it so much you will choke on the two-stroke smoke! The author has a thing for the Honda Scramblers, as if they were dark-haired beauties in bikinis or something. The kings of upswept exhaust pipes and crossbrace handlebars get their own chapter. Once you have possession of this book, you will never want to give it up. The Tidder Invasion is not a coffee table book of pretty color pictures. It is a reference guide crammed to the Snuff-or-Nots with useful info for collectors and enthusiasts of small classic motorcycles. The author began collecting motorcycle brochures and magazines in 1962. Reproductions of and detailed information from these sources are included in this extensive reference guide. The author of this book is not a collector, a photographer, or a restorer. He is a super-nerd who clearly loves these classic machines. The earliest part of this book was written in 1985 on a 1959 IBM typewriter. Now with the help of modern computers, the whole, wonderful, magical story of that very special era in American history can finally be told!

**Scootermania** Josh Sims 2015-11-05 From its origins the Italian battlefields of the Second World War, to

movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made the bikes their own – from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta Li 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneret are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists.

*Customizing Your Motorcycle* Chris Daniels 2018-02-23 Building a custom motorcycle has never been more popular, with even the major manufacturers keen to capitalize on the growing trend. A custom motorbike is the product of an owner using their own skills to produce an individual machine, and with the right tools and approach it is well within most people's means to take a standard machine, new or second-hand, and make it their personal statement. Providing clear and practical advice, this new book, *Customizing Your Motorcycle - Shed-Built to Show Bike* introduces the reader to the techniques and processes needed to customize any motorcycle. Eschewing the practice of using expensive off-the-shelf parts, it shows how the shrewd use of salvaged and alternative sources is not only economic but also results in a satisfyingly unique custom machine. Projects demonstrate how to make custom parts, while examples of how different custom bikes were built by the author show how they are designed and put together. The book covers: An introduction to the main styles on which today's custom scene was founded; Choosing a suitable bike and how to make decisions when buying second-hand; Workshop setup and tools; Components of a bike and custom parts; Basic improvements and the essential maintenance to make a safe and usable bike; Modifying frames and building seats, tanks and other components; Welding, cleaning and preparation for painting.
