Jon Rogawski 2018-12-28 We see teaching mathematics as a

form of story-telling, both when we present in a classroom and when we write materials for exploration and learning. The goal is to explain to you in a captivating manner, at the right pace, and in as clear a way as possible, how mathematics works and what it can do for you. We find mathematics to be intriguing and immensely beautiful. We want you to feel that way, too.

a three- to five-semester real variable calculus program, involving real-valued functions of a single real variable (differential calculus in Chapters 1-4 and integral calculus in Chapters 5-8), as well as vector valued functions of a single real variable (covered in Chapter 12), real-valued functions of several real variables (in Chapters 13-15), and vector-valued functions of several real variables (in Chapters 16-18). Chapter 9 concerns sequences and series, and its position is rather arbitrary."--
