The Hack Mechanic Guide to European Automotive Electrical Systems Rob Siegel 2016-06-27 Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems.

The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades.Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. BMW 3-Series (E30) Performance Guide Robert Bowen 2013-02-15 The model that truly launched BMW into the performance arena in the United States were the second generation of 3-series cars. Today, the E30 family of BMWs are both readily affordable, and are popular with enthusiasts wanting to personalize them. *Unbeatable BMW* Jeremy Walton 1998 Unbeatable BMW is the comprehensive history of BMW competition from 1917 through 1997. The first edition of Unbeatable BMW became a cult classic among enthusiasts, but its coverage was restricted to the years 1959-79. Now, this astounding story has been massively expanded by the author in a hardcover format, richly illustrated in full color. Jeremy Walton weaves together the tale of BMW's engineering know-how, daredevil drivers, inimitable team leaders, and the cars they championed and drove to the winner's circle. Behind BMW's envied reputation and the whirling-propeller badge are such legends as the prewar BMW 328 sports cars and the 1990s 200 m.p.h. McLaren/BMW V12s. Unbeatable BMW also gives first-hand tales of BMW's aviation and motorcycling deeds. Included are gripping accounts of the preparation and track-side action for such emotive winners as the diminutive BMW 700 coupes to the 1800 "Tisa" and 2002s. Walton sweeps through the 1970s "Batmobile" 3.0 CSL lightweight racing coupes, then explores the best-selling 3-series in every race category. Walton also covers the unexpected success of the 5- and 6-series, the latter against Jaguar. Unbeatable BMW recalls the establishment of BMW's Motorsport division, and the thrill of the first M-Powered cars. From M1 onward, the author details the burgeoning M-brand, how MPower won the first world title for a turbocharged car (1983), and the years as the backbone of European Formula 2. The book's 582 pages are packed with detail to thrill the heart of the most ardent BMW fan, from meticulous photo captions listing car, driver, and race date, to six appendices covering the competition cars since 1960, drivers' accomplishments, and powerplant specifications. In short, if BMW has raced, rallied, or flown their products in competition, Unbeatable BMW gives the full, behind-the-scenes story in this compelling account of the marque's motorsports history.

[Antistatic Sprays](#) National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the

chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
