*A Critique of Adjudication* Duncan Kennedy 1997 'A Critique of Adjudication' explores the aspects and implications of adjudication as few books have in this century. With an eye to the current state of theory, legal or otherwise, the author includes a provocative discussion of postmodernism.

*Parentology* Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a

vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

**Farnsworth on Contracts** Edward Allan Farnsworth 1998 Bring the expertise of America's foremost authority on contracts into your practice with this thoroughly updated three-volume set. Farnsworth on Contracts, Second Edition, is where doctrine meets practice. Busy practitioners count on Farnsworth's proven ability to identify the essentials and omit extraneous material. His comprehensive coverage of the full range of contract law answers questions in hundreds of important areas, including: Good faith and fair dealing -- Precontractual liability -- Agreements to negotiate -- Vienna Convention on International Sales -- Contracts -- UNIDROIT principles -- Constitutional issues -- Settlement of disputed claims by check -- Options and rights of first refusal -- Employee

handbooks -- Covenants not to compete -- Self-help measures. He illustrates how contemporary contract law has been shaped by both the Restatement (Second) of Contracts for -- which he served as Reporter -- and the Uniform Commercial Code. Easy access to specifics, new cases, new drafting tips, new references, and timesaving features like cross-referenced cases and marginal heads make this three-volume set a valuable resource for litigation, arbitration, and practice. **Rethinking Legal Scholarship** Rob van Gestel 2017-02-02 Although American scholars sometimes consider European legal scholarship as old-fashioned and inward-looking and Europeans often perceive American legal scholarship as amateur social science, both traditions share a joint challenge. If legal scholarship becomes too much separated from practice, legal scholars will ultimately make themselves superfluous. If legal scholars, on the other hand, cannot explain to other disciplines what is academic about their research, which methodologies are typical, and what

separates proper research from mediocre or poor research, they will probably end up in a similar situation. Therefore we need a debate on what unites legal academics on both sides of the Atlantic. Should legal scholarship aspire to the status of a science and gradually adopt more and more of the methods, (quality) standards, and practices of other (social) sciences? What sort of methods do we need to study law in its social context and how should legal scholarship deal with the challenges posed by globalization?

**Criminal Law and Procedure** Donald A. Dripps 2013 This casebook provides the most comprehensive treatment available, including the theoretical foundations, the common-law origins, the statutory structure, and the procedural context of modern criminal law. The book concentrates on doctrinal materials that can support both rigorous technical, and sophisticated theoretical, discussions. The purposes and limits of punishment are addressed through Supreme Court decisions, a focus on statutes throughout the substantive law sections enables training students in the legal art of statutory interpretation as well as exposing them to the hard moral and political problems of legislative choice, and the sentencing materials reprise the theory of punishment in the context of the practically most important stage of the modern process. The 12th edition carries forward the comprehensive approach of prior editions, empowering the teacher to design a course suited to the needs of the teacher's students and institution. New Supreme Court's decisions, changing the landscape of both substance and procedure, include *Skilling v. United States*, *McDonald v. City of Chicago*, *Graham v. Florida*, *United States v. Jones*, and *Michigan v. Bryant*. The material on self-defense has been comprehensively revised, both for the sake of clarity and to include discussion of so-called "stand your ground laws." Statutes (e.g., the New York and California homicide statutes) and the caselaw (e.g., up-to-the-minute material on "willful blindness") have been updated. We also now include a case about the admissibility of neuro-imaging evidence to support a diminished-capacity defense, thus acknowledging how modern brain science has begun to raise both practical evidentiary issues and a substantial challenge to important theoretical p
