Descrittione Di Tutta Italia Leandro Alberti 1551

Regional Pathways to Complexity P. A. J. Attema 2010 Deze bundel is een mijlpaal in het onderzoek naar de Oude Middellandse Zee. Met behulp van een vergelijkende aanpak, zijn drie verschillende regionale landschappen van Italië uitvoerig onderzocht door archeologen. Om een zeer gedetailleerd beeld te krijgen van de ontwikkeling van menselijke activiteiten van de late Bronstijd tot de opkomst van het Romeinse Rijk, is er minutieus onderzoek gedaan naar nederzettingen, heiligdommen en begraafplaatsen. De milieugeschiedenis van deze gebieden en de geschiedenis van het door mensen gebruikte land zijn parallel

geanalyseerd door gespecialiseerde projecten. Wat ontstaat, is een ongeëvenaarde reeks van inzichten in hoe regionale samenlevingen zich intern ontwikkelen en reageren op externe interventies zoals het kolonialisme, imperialisme en internationale handel.

Troy and Its Remains Heinrich Schliemann 1875

Archives, Ancestors, Practices Nathan Schlanger 2008-06-30

In line with the resurgence of interest in the history of archaeology manifested over the past decade, this volume aims to highlight state-of-the art research across several topics and areas, and to stimulate new approaches and studies in the field. With their shared historiographical commitment, the authors, leading scholars and emerging researchers, draw from a wide range of case studies to address major themes such as historical sources and methods; questions of archaeological practices and the practical aspects of knowledge production; 'visualizing archaeology' and the multiple roles of iconography and imagery;

and 'questions of identity' at local, national and international levels.

Sarcophagi from the Jewish Catacombs of Ancient Rome

Adia Konikoff 1990 This comprehensive inventory of all known sarcophagi from the Jewish catacombs of Rome, is the first specialized treatment of this subject in monograph form. It describes and analyses each sarcophagus and provides full reference material which it critically examines. This work thus fills a lacuna in the literature on this field, which has up to now been confined to the treatment of early Christian and pagan sarcophagi of the period. ♦ We have here a complete overview of the Jewish sarcophagi of ancient Rome, all of them illustrated by photographs and provided with extensive bibliographies. This work thus fills a lacuna in the literature on this field. ♦ Journal for the Study of Judaism ♦ Until this book, however, no one has attempted to assemble all of the Jewish sarcophagi separately in one place and to provide relevant information in the form of a well-ordered catalogue. For this reason, Konikoff's book provides a welcome resource for anyone interested in the material evidence of ancient Judaism and forms a good beginning for study of the sarcophagi, especially from a bibliographic point of view. ♦ Gnomon .

Property Rights in Land Rosa Congost 2016-10-04 Property Rights in Land widens our understanding of property rights by looking through the lenses of social history and sociology, discussing mainstream theory of new institutional economics and the derived grand narrative of economic development. ? As neo-institutional development theory has become a narrative in global history and political economy, the problem of promoting global development has arisen from creating the conditions for 'good' institutions to take root in the global economy and in developing societies. Written by a collection of expert authors, the chapters delve into social processes through which property relations became institutionalized and were used in social action for the

appropriation of resources and rent. This was in order to gain a better understanding of the social processes intervening between the institutionalized 'rules of the game' and their economic and social outcomes. This collection of essays is of great interest to those who study economic history, historical sociology and economic sociology, as well as Agrarian and rural history.

Epics of Sumerian Kings H. L. Herman L. J. Vanstiphout 2004

This volume presents for the first time both the authoritative Sumerian text and an elegant English translation of four Sumerian epics, the earliest known in any language. The introduction discusses the intellectual and cultural context as well as the poetics and meaning of this epic cycle.

Symmetry Breaking in the Standard Model Franco Strocchi 2019-07-03 The book provides a non-perturbative approach to the symmetry breaking in the standard model, in this way avoiding the critical issues which affect the standard presentations. The debated empirical meaning of global and local gauge symmetries is clarified. The absence of Goldstone bosons in the Higgs mechanism is non-perturbatively explained by the validity of Gauss laws obeyed by the currents which generate the related global gauge symmetry. The solution of the U(1) problem and the vacuum structure in quantum chromodynamics (QCD) are obtained without recourse to the problematic semiclassical instanton approximation, by rather exploiting the topology of the gauge group.

The State of Architecture at the Beginning of the 21st

Century Bernard Tschumi 2003 In March 2003, Bernard Tschumi convened forty of the world's leading architectural designers and

theorists -- Elizabeth Diller, Peter Eisenman, Zaha Hadid, Steven Holl, Rem Koolhaas, Greg Lynn, Winy Maas, Thom Mayne, Ben van Berkel, Mark Wigley, Alejandro Zaera-Polo, and many others - for a conference at Columbia University. The exceptional array was asked to predict the conversations and directions of architectural practice in the 21st century. Speakers addressed the categories of current architectural discourse -- form, aesthetics, material, detail, politics -- and questioned their future validity. Other topics included architects' obsession with the detail, the possibility of practicing a politics of material, the definition of an avant-garde urbanism, the importance of form beyond its aesthetic value, and whether architecture can directly influence the social world. The State of Architecture brings together manifestos, musings, and meditations to capture the key polemics raised by this extraordinary convocation of thinkers.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on

the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Delphi Michael Scott 2014-03-10 A comprehensive narrative history of the ancient world's center, from its founding to its modern rediscovery The oracle and sanctuary of the Greek god Apollo at Delphi were known as the "omphalos"—the "center" or "navel"—of the ancient world for more than 1,000 years. Individuals, city leaders, and kings came from all over the Mediterranean and beyond to consult Delphi's oracular priestess; to set up monuments to the gods; and to take part in competitions. In this richly illustrated account, Michael Scott covers the history and nature of Delphi, from the literary and archaeological evidence surrounding the site, to its rise as a center of worship, to the constant appeal of the oracle despite her cryptic prophecies. He describes how Delphi became a contested sacred site for Greeks and Romans and a storehouse for the treasures of rival city-states and foreign kings. He also examines the eventual decline of the site and how its meaning and importance have continued to be reshaped. A unique window into the center of the ancient world, Delphi will appeal to general readers, tourists, students, and specialists.

Zecca Alan M. Stahl 2000 Winner of the Professional/Scholarly Publishing Award in Economics from the Association of American Publishers Within a few months of assuming the position of curator of medieval coins at the American Numismatic Society in 1980, Alan M. Stahl was presented with a plastic bag containing a hoard of 5,000 recently discovered coins, most of which turned out to be from medieval Venice. The course of study of that hoard

(and a later one containing more than 14,000 coins) led him to the Venetian archives, where he examined thousands of unpublished manuscripts. To provide an even more accurate account of how the Zecca mint operated in Venice in the thirteenth through fifteenth centuries, Stahl commissioned scientific analyses of the coins using a variety of modern techniques, uncovering information about their content and how they had been manufactured. The resulting book, *Zecca: The Mint of Venice in the Middle Ages*, is the first to examine the workings of a premodern mint using extensive research in original documents as well as detailed study of the coins themselves. The first of the book's three sections traces the coinage of Venice from its origins in the ninth century as a minor, and unofficial, regional Italian coinage to its position at the dawn of the Renaissance as the dominant currency of Mediterranean trade. The second section, entitled "The Mint in the Life of Medieval Venice," illustrates the mechanisms of the control of bullion and the strategies for mint profit and explores the mint's role in Venetian trade and the emergence of a bureaucratized government. The third section, "Within the Mint," examines the physical operations that transformed raw bullion into coins and identifies the personnel of the mint, situating the holders of each position in the context of their social and professional backgrounds. Illustrated with photos of Venetian coinage from the world's major collections, *Zecca* also includes a listing of all holders of offices related to the medieval Venetian mint and summaries of all major finds of medieval Venetian coins.

[History of the Italian Agricultural Landscape](#) Emilio Sereni 2014-07-14 Emilio Sereni's classic work is now available in an English language edition. *History of the Italian Agricultural Landscape* is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. *History of the Italian Agricultural Landscape* first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.

These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
