• Write an investigation

report – remember there is a free Acas template

Safety requirements for pressure testing GS4 - HSE

Using CCTV affords test-witnessing and leak-identification from a safe distance. It also provides a visual record of test performance. For hydraulic testing, fluid release/seepage will leave physical traces of a failure point. Where water is used, a dye can be added to assist identifying the origin of a leak, or porosity within a casting.

Preventing suicides in public places - GOV.UK

Part 2. A step-by-step guide to
identifying locations and taking
action The process of preventing
suicides in public places has four
main steps. Step 1. Identify
locations used for suicide and
prioritise on the basis of frequency.
This requires the systematic
collection and analysis of local
data. Step 2. Plan and take action at
priority locations.
