Data Mining: Concepts and Techniques - Elsevier

A database system supports ad-hoc query and on-line transaction processing. For more details, please refer to the section "Differences between operational database systems and data warehouses."
Similarities between a data warehouse and a database:
Both are repositories of information, storing huge amounts of persistent data. 3.

Bitcoin: A Peer-to-Peer Electronic Cash System

benefits are lost if a trusted third party is still required to prevent double-spending. We propose a solution to the double-spending problem using

a peer-to-peer network. The network timestamps transactions by hashing them into an ongoing chain of hash-based proof-of-work, forming a record that cannot be changed without redoing the proof-of-work.
