Parentology Dalton
Conley 2014-03-18 An
award-winning scientist
offers his unorthodox
approach to
childrearing:
“Parentology is
brilliant, jaw-
droppingly funny, and
full of wisdom...bound to
change your thinking
about parenting and its
conventions” (Amy Chua,
author of *Battle Hymn of*
the Tiger Mother). If
you’re like many
parents, you might ask
family and friends for
advice when faced with
important choices about
how to raise your kids.
You might turn to
parenting books or
simply rely on timeworn
religious or cultural
traditions. But when
Dalton Conley, a dual-

doctorate scientist and
full-blown nerd, needed
childrearing advice, he
turned to scientific
research to make the big
decisions. In
Parentology, Conley
hilariously reports the
results of those
experiments, from
bribing his kids to do
math (since studies show
conditional cash
transfers improved
educational and health
outcomes for kids) to
teaching them impulse
control by giving them
weird names (because
evidence shows kids with
unique names learn not
to react when their
peers tease them) to
getting a vasectomy
(because fewer kids in a
family mean smarter
kids). Conley encourages
parents to draw on the
latest data to rear
children, if only
because that level of
engagement with kids
will produce solid and
happy ones. Ultimately

these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
