Agency and Identity in the Ancient Near East Sharon R. Steadman 2016-04-01 Agency theory examines the relationship between individuals or groups when one party is doing work on behalf of another. 'Agency and Identity in the Ancient Near East' offers a theoretical study of agency and identity in Near Eastern archaeology, an area which until now has been largely ignored by archaeologists. The book explores how agency theory can be employed in reconstructing the meaning of spaces and material culture, how agency and identity intersect, and how the availability of a textual corpus may impact on the agency approach. Ranging from the Neolithic to the Islamic period, 'Agency and Identity in the Ancient Near East' covers sites located in Turkey, Iraq, Syria, Jordan, Palestine, and Israel. The volume includes contributions from philology, art, history, computer simulation studies, materials science, and the archaeology of settlement and architecture.

Measuring History S. G. Grant 2009-03-01 Measuring History complements the cases presented in Wise Social Studies Practices (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of Measuring History are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

Tackling the Intractable Michael Chiller-Glaus 2007 Finding a solution to the issue of Palestinian refugees has remained the main hurdle for an Israeli-Palestinian peace settlement. This book represents a comprehensive political analysis of the Palestinian refugee issue. It tackles the matter on four dimensions. First, the historical context of the Palestinian exodus in both 1948 and 1967 is reviewed. Second, the question is traced whether there exists a Palestinian right of return according to international law. Third, an examination is presented regarding how and why the issue of refugees has remained a stumbling block during the Israeli-Palestinian peace talks. Fourth, the main part of the book analyses potential solutions to the refugee question, complementing the existing proposals with models developed by the author. What are their implications for both sides? What are the advantages and disadvantages of each proposal to Israelis and Palestinians, respectively? What is the relevance of each proposal as a mutually acceptable solution? Finally, a set of recommendations and guide-lines for future Israeli-Palestinian negotiations on refugees is presented. Overall, this study constitutes a valuable reference for anyone interested in a solution of the most intractable aspect of the Israeli-Palestinian conflict.
