**WALNECK'S CLASSIC CYCLE TRADER,**

**FEBRUARY 2008** Causey Enterprises, LLC

**Mastering the Ride** David L. Hough

2012-07-24 Best-selling author David Hough is the anti-bad ass of motorcyclists, a serious down-to-earth master of two- (and three-) wheeled street rods who is interested in the safety and road smarts of his fellow motorcyclists. Mastering the Ride is his follow-up book to one that put him on the map, Proficient Motorcycling, and it goes one better. For motorcyclists ready to take their rides to the next level, Mastering the Ride is an exhilarating

course in skills, safety, and common sense. Hough's writing style is straightforward and conversational, never professorial, preachy, or boring. With instructional color photographs and drawings, the book covers improving the rider's skills of speed and passing on superslabs, mountain roads, and city streets; anticipating and handling street and road hazards, from treacherous tar snakes to lane-weaving drivers; and learning the limits of sight distances, executing quick stops at sudden hazards as well as curves. The book devotes two full chapters to the skills involved in mastering cornering, with specific advice about rolling on and off the throttle, shifting, braking, countersteering, body steering and positioning, and cornering lines. In the chapter "Mastering the Art of Conspicuity," Hough recommends riders understand and employ conspicuity, that is understanding how motorcyclists and car drivers see their surroundings and getting others to see you on the road by use of hi-viz clothing, LED lights,

and other gear. The key to safety rests in increased situational awareness;the topic of the next chapter;the ability to predict how road events will unfold by thinking through the possibilities way before a potential hazard presents itself. Thanks to Hough's direct and specific instructions to riders for what they need to know, to improve, to avoid, and to do every time they get on their bikes, this chapter and the skills it describes are nothing short of life-saving.In short, Mastering the Ride is a crash course in how not to crash;that is, after all is read and done, what every motorcyclists must avoid for his own life and the lives of others on the road. As Eric Trow, a motorcycle safety journalist and instructor states on the back cover, "Mastering the Ride should be required reading for every road-going motorcyclist and become the companion of any rider serious about advancing his or her road craft." Voni Graves, the record-setting million-mile BMW rider, is a long-time Hough fan who relied on

Hough's "wisdom" back in the 1970s when the author was a columnist. "The latest from David brings together his years of experience and his unique analysis to make the case for mastery in a conversational way that makes [Mastering the Ride] impossible to put down. The breadth and depth of the information;is astounding."A section on the aging rider, including ways to compensate for older riders' slower reaction times and readapting their skills, is included in the appendix, as is a travelogue of Hough's road trips to some of his favorite locations. A glossary, resources section, and index complete the book.

Joining the "regular folks" interviewed are celebrities, including Peter Fonda, Gen. Tommy Franks, John Paul DeJoria, Jillian Michaels, Kyle Petty, Carey Hart, and Norman Reedus, along with a former chair of the Joint Chiefs of Staff, a Congressman, a Senator, a former NASA astronaut, governors, military generals, actors, rock n'roll and country artists, corporate executives, and NFL, NBA, MLB sports figures. **At the Creation** Herbert Wagner 2003 *At the Creation* by Herbert Wagner brings to life the human side of Harley-Davidson's quest to motorize the bicycle and then to promote it as a powerful, fast, reliable, and thrilling means of personal transportation. This book examines the origins of two-wheeled transportation from a time when combining the gasoline engine with

the bicycle was the province of dreamers and con men. This is the definitive account of the beginnings of the only American motorcycle brand to ultimately succeed and survive. Backed by a decade of research, *At the Creation* documents for the first time the early years of the Harley-Davidson motorcycle in its birthplace of Milwaukee, Wisconsin, an area that was an early center of motorcycle manufacturing. Previous books on Harley-Davidson have failed to adequately cover this critical period, which has been described as the "era of mystery" by Harley-Davidson company historian Martin Jack Rosenblum. *At the Creation* takes on several long-standing puzzles and myths, and then, through the use of period documents and original photographs, recreates the actual events of Harley's first years as they most plausibly occurred.

The Harley-Davidson Story Aaron Frank  
2018-11-20 The Harley-Davidson Story: Tales from the Archives is a fascinating, visually driven overview of the motor company's rich story, created in cooperation with the Harley-Davidson Museum. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether

introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

The Messerschmitt Bf 110 entered war service  
on 1st September 1939 with the 'C-1' variant. By  
the end of 1940, by which time the type had  
fought in the Polish campaign, the various  
campaign on the European mainland, and the

Battle of Britain, it had gone through various changes and roles, and had developed as far as the 'E' variant. Authors John Vasco and Fernando Estanislau have already done comprehensive work on the many variants of the Bf 110 prior to undertaking this new project, and have brought their extensive knowledge of the aircraft to bear on producing this work on the 'C', 'D' and 'E' variants. The book shows the changes within each variant, starting with a lead-in detailing the changes from the pre-war 'B' variant to the 'C'. The many sub-variants of the 'C' are detailed, and the 'D' variant covers the 'Dackelbauch' long range fighter version and the 'D-3' variant which sought to provide extra range by way of auxiliary fuel tanks under the wings rather than the cumbersome 'Dackelbauch'. The 'E' shows the move to the provision of heating in the cockpit for the crew, as well as the 'E' reconnaissance version and the rarely seen Bf 110 Cs and Es that were converted for duties towing the large Luftwaffe

gliders. As well as using well-known photographs to illustrate the many facets of the design and development of the aircraft, the authors have also been able to call upon many previously unpublished photographs. Fernando Estanislau's excellent artwork considerably enhances the work. This book is a feast for the Luftwaffe enthusiast, and with the recent introduction of new Bf 110 plastic model kits, it is a 'must-have' for the aviation modeller seeking to identify the exact details of any sub-variant from the 'C' to the 'E'.

*Race Tech's Motorcycle Suspension Bible* Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your

suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem. If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist

and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy.

You'll be laughing and learning at the same time.
