The need to develop frameworks for joint problem-solving involving diverse stakeholders is unquestionable. Besides generating inclusivity, which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more.

The Museum's Borders Simon Knell 2020-10-08 The Museum's Borders demonstrates that museum practices are deeply entangled in border making, patrol, mitigation and erasure, and that the border lens offers a new tool for deconstructing and reconfiguring such practices. Arguing that the museum is a critical institution for the operation of knowledge-based democracies, Knell investigates how they have been used by scientists, art historians and historians to construct our bordered world. Examining the role of museums in the Windrush scandal in Britain, the exclusion of Black artists in America, ideological and propaganda discourses in Europe and China, and the remembering of contested pasts in the Balkans, Knell argues for the importance of museums in countering unethical, nationalistic, post-fact political discourse. Using the principles of Knell's 'Contemporary Museology', The Museum's Borders considers the significance of the museum for societies that wish to know and remember in ways that empower citizens and build cohesive societies. The book will be of great interest to students and academics engaged in the study of museums and heritage, art history, science studies, cultural studies, anthropology, memory studies and history. It is required reading for museum professionals seeking to adopt non-discriminatory practices.

Edwardian House Trevor Yorke 2013 Edwardian houses, built between 1880 and 1914, remain some of our best constructed, elegant, and durable housing stock. Many were influenced by the romantic styles of Art Nouveau and the Arts and Crafts Movement. It was an age of mass production, but the pride in these homes shown by their builders is still evidenced by the dates of construction and the rural names given to them, often seen above the front door or carefully

chiseled onto a plaque below the roof. This book focuses on the original exterior and interior features that would have been added by the builder but which may since have been replaced or removed. They include sash and casement windows, coloured glass, door plates and handles, letter boxes, porches, balconies, rainwater hoppers, fireplaces, stairs, wall mouldings, and fitted cupboards. A strong pride of ownership remains with today's owners. For anyone restoring features in their own Edwardian home, or who simply enjoys an admiration of period properties, then this book will be an invaluable guide. ."
