Altars Restored Kenneth Fincham 2007-11-29 By looking at what happened physically in the local churches, in contrast to the formal enactments of government, and using sources such as churchwardens' accounts and surviving religious artefacts, the book recaptures the experience of the ordinary parishioner in this crucial period of religious change.
Data Analysis in Management with SPSS Software J.P. Verma 2012-12-13 This book provides readers with a greater understanding of a variety of statistical techniques along with the procedure to use the most popular statistical software package SPSS. It strengthens the intuitive understanding of the material, thereby increasing the ability to successfully analyze data in the future. The book provides more control in the analysis of data so that readers can apply the techniques to a broader spectrum of research problems. This book focuses on providing readers with the knowledge and skills needed to carry out research in management, humanities, social and behavioural sciences by using SPSS.

Riviera to the Rhine (Classic Reprint) Jeffrey J. Clarke 2015-07-11 Excerpt from Riviera to the Rhine With the publication of Riviera to the Rhine, the Center of Military History completes its series of operational histories treating the activities of the U. S. Army's combat forces during World War II. This volume examines the least known of the major units in the European theater, General Jacob L. Devers' 6th Army Group. Under General Devers' leadership, two armies, the U. S. Seventh Army under General Alexander M. Patch and the First French Army led by General Jean de Lattre de Tassigny, landing on the Mediterranean coast near Marseille in August 1944, cleared the enemy out of southern France and then turned east and joined with army groups under Field Marshal Sir Bernard L. Montgomery and General Omar N. Bradley in the final assault on Germany. In detailing the campaign of these Riviera-based armies, the authors have concentrated on the operational level of war, paying special attention to the problems of joint, combined, and special operations and to the significant roles of logistics, intelligence, and personnel policies in these endeavors. They have also examined in detail deception efforts at the tactical and operational levels, deep battle penetrations, river-crossing efforts, combat in built-up areas, and tactical innovations at the combined arms level. Such concepts are of course very familiar to today's military students, and the fact that this volume examines them in such detail makes this study especially valuable to younger officers and noncommissioned officers. In truth, the challenges faced by military commanders half a century ago were hardly unique. That is why I particularly urge today's military students, who might well face some of these same problems in future combat, to study this campaign so that they might learn from their illustrious predecessors in the profession of arms. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
Thinking with Demons Stuart Clark 1999 Dr Clark offers an interpretation of the witchcraft beliefs of European intellectuals of the period, based on their publication in the field of demonology. This work will increase our understanding of the cultural history of early modern Europe.
Medieval Marriage Sermons David D'Avray 2001-07-12 Before the advent of printing, the preaching of the friars was the mass medium of the middle ages. This edition of marriage sermons reveals what a number of famous preachers actually taught about marriage. David D'Avray teases out the close connection between marriage symbolism and social, cultural, and legal realities in the thirteenth century. The relation between genre, content, and gender is analysed, with particular attention to the likely impact of preaching, viewed as a means of intellectual power in competition with vernacular genres and other social forces. Its mass diffusion anticipated printing, but the means of production were those of the monastic scriptorium. Professor D'Avray's textual criticism and palaeographical analsyis of these sermons undermines central assumptions of both medieval and early modern historians of the book. He establishes a technique of textual criticism appropriate for texts of this kind: a pragmatic compromise between simple transcriptions which ignore stemmatic relation and full-scale editions attempting to fit all manuscripts into a genealogical table, Medieval Marriage Sermons makes an important contribution both to the sermon literature of the period, and to our understanding of marriage and its religious and cultural significance in the middle ages.
The Power of Gifts Felicity Heal 2014 Gifts are always with us: we use them positively to display affection and show gratitude for favours; we suspect that others give and accept them as douceurs and bribes. The gift also performed these roles in early modern English culture: and assumed a more significant role because networks of informal support and patronage were central to social and political behaviour. Favours, and their proper acknowledgement, were preoccupations of the age of Erasmus, Shakespeare, and Hobbes. As in modern society, giving and receiving was complex and full of the potential for social damage. 'Almost nothing', men of the Renaissance learned from that great classical guide to morality, Lucius Annaeus Seneca, 'is more disgraceful than the fact that we do not know how either to give or receive benefits'. The Power of Gifts is about those gifts and benefits - what they were, and how they were offered and received in the sixteenth and seventeenth centuries. It shows that the mode of giving, as well as what was given, was crucial to social bonding and political success. The volume moves from a general consideration of the nature of the gift to an exploration of the politics of giving. In the latter chapters some of the well-known rituals of English court life - the New Year ceremony, royal progresses, diplomatic missions - are viewed through the prism of gift-exchange. Gifts to monarchs or their ministers could focus attention on the donor, those from the crown could offer some assurance of favour. These fundamentals remained the same throughout the century and a half before the Civil War, but the attitude of individual monarchs altered specific behaviour. Elizabeth expected to be wooed with gifts and dispensed benefits largely for service rendered, James I modelled giving as the largesse of the Renaissance prince, Charles I's gift-exchanges focused on the art collecting of his coterie. And always in both politics and the law courts there was the danger that gifts would be corroded, morphing from acceptable behaviour into bribes and corruption. The Power of Gifts explores prescriptive literature, pamphlets, correspondence, legal cases and financial records, to illuminate social attitudes and behaviour through a rich series of examples and case-studies.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom…bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
Progressive Grocer's Marketing Guidebook 2004
John Lydgate's Fall of Princes Assistant Head and Head of English Nigel Mortimer 2005 Publisher description
The Abbots and Priors of Late Medieval and Reformation England Martin Heale 2016-09-22 The importance of the medieval abbot needs no particular emphasis. The monastic superiors of late medieval England ruled over thousands of monks and canons, who swore to them vows of obedience; they were prominent figures in royal and church government; and collectively they controlled properties worth around double the Crown's annual ordinary income. Moreover, as guardians of regular observance and the primary interface between their monastery and the wider world, abbots and priors were pivotal to the effective functioning and well-being of the monastic order. The Abbots and Priors of Late Medieval and Reformation England provides the first detailed study of English male monastic superiors, exploring their evolving role and reputation between the fourteenth and sixteenth centuries. Individual chapters examine the election and selection of late medieval monastic heads; the internal functions of the superior as the father of the community; the head of house as administrator; abbatial living standards and modes of display; monastic superiors' public role in service of the Church and Crown; their external relations and reputation; the interaction between monastic heads and the government in Henry VIII's England; the Dissolution of the monasteries; and the afterlives of abbots and priors following the suppression of their houses. This study of monastic leadership sheds much valuable light on the religious houses of late medieval and early Tudor England, including their spiritual life, administration, spending priorities, and their multi-faceted relations with the outside world. The Abbots and Priors of Late Medieval and Reformation England also elucidates the crucial part played by monastic superiors in the dramatic events of the 1530s, when many heads surrendered their monasteries into the hands of Henry VIII.

Restoration, Reformation, and Reform, 1660-1828 Jeremy Gregory 2000-04-20 This wide-ranging and original book makes a significant contribution to our understanding of the Church of England in the long eighteenth century. It explores the nature of the Restoration ecclesiastical regime, the character of the clerical profession, the quality of the clergy's pastoral work, and the question of Church reform through a detailed study of the diocese of the archbishops of Canterbury. In so doing the book covers the political, social, economic, cultural, intellectual and pastoral functions of the Church and, by adopting a broad chronological span, it allows the problems and difficulties often ascribed to the eighteenth-century Church to be viewed as emerging from the seventeenth century and as continuing well into the nineteenth century. Moreover, the author argues that some of the traditional periodizations and characterisations of conventional religious history need modification. Much of the evidence presented here indicates that clergy in the one hundred and seventy years after 1660 were preoccupied with difficulties which had concerned their forebears and would concern their successors. In many ways, clergy in the diocese of Canterbury between 1660 and 1828 continued the work of seventeenth-century clergy, particularly in following through, and in some instances instigating, the pastoral and professional aims of the Reformation, as well as participating in processes relating to Church reform, and further anticipating some of the deals of the Evangelical and Oxford Movements. Reluctance to recognise this has led historians to neglect the strengths of the Church between the Restoration and the 1830s, which, it is argued, should not be judged primarily for its failure to attain the ideals of these other movements, but as an institution possessing its own coherent and positive rationale.
Oral and Literate Culture in England, 1500-1700 Adam Fox 2000-11-09 This book explores the varied vernacular forms and rich oral traditions which were such a part of popular culture in early modern England. It focuses, in particular, upon dialect speech and proverbial wisdom, "old wives' tales" and children's lore, historical legends and local customs, scurrilous versifying and scandalous rumour-mongering. Adam Fox argues that while the spoken word provides the most vivid insight into the mental world of the majority in this semi-literate society, it was by no means untouched by written influences. Even at the beginning of the period, centuries of reciprocal infusion between complementary media had created a cultural repertoire which had long ceased to be purely oral. Thereafter, the expansion of literacy together with the proliferation of texts both in manuscript and print saw the rapid acceleration and elaboration of this process. By 1700 popular traditions and modes of expression were the product of a fundamentally literate environment to a much greater extent than has yet been appreciated.
Fluid- and Gasdynamics G.H. Schnerr 2013-03-08 This volume offers a wide range of theoretical, numerical and experimental research papers on fluid dynamics. The major fields of research - fundamentals of fluid mechanics as well as their applications - are treated: - stability phenomena: convective flow, thermal and hydrodynamic systems - transition, turbulence and separation: boundary-layer, turbulent combustion, rarefied gasdynamics, near wall and off wall flow fields, energy dissipation - transonic flow: homogeneous condensation, shock-waves, effects at Mach number unity - hypersonic flow: flow over spheres, aerothermodynamics, relaxation - fluid machinery: axial fans, compressor cascades, fluid couplings - computational fluid dynamics: passive shock control, zonal computation, cylinderflow, flow over wings - miscellaneous problems.

Blood and Violence in Early Modern France Stuart Carroll 2006-05-25 The rise of civilized conduct and behaviour has long been seen as one of the major factors in the transformation from medieval to modern society. Thinkers and historians alike argue that violence progressively declined as men learned to control their emotions. The feud is a phenomenon associated with backward societies, and in the West duelling codified behaviour and channelled aggression into ritualised combats that satisfied honour without the shedding of blood. French manners and codes of civility laid the foundations of civilized Western values. But as this original work of archival research shows we continue to romanticize violence in the era of the swashbuckling swordsman. In France, thousands of men died in duels in which the rules of the game were regularly flouted. Many duels were in fact mini-battles and must be seen not as a replacement of the blood feud, but as a continuation of vengeance-taking in a much bloodier form. This book outlines the nature of feuding in France and its intensification in the wake of the Protestant Reformation, civil war and dynastic weakness, and considers the solutions proposed by thinkers from Montaigne to Hobbes. The creation of the largest standing army in Europe since the Romans was one such solution, but the militarization of society, a model adopted throughout Europe, reveals the darker side of the civilizing process.
The Invention of Papal History Stefan Bauer 2019-12-05 How was the history of post-classical Rome and of the Church written in the Catholic Reformation? Historical texts composed in Rome at this time have been considered secondary to the city's significance for the history of art. The Invention of Papal History corrects this distorting emphasis and shows how historical writing became part of a comprehensive formation of the image and self-perception of the papacy. By presenting and fully contextualising the path-breaking works of the Augustinian historian Onofrio Panvinio (1530-1568), Stefan Bauer shows what type of historical research was possible in the late Renaissance and the Catholic Reformation. Crucial questions were, for example: How were the pontiffs elected? How many popes had been puppets of emperors? Could any of the past machinations, schisms, and disorder in the history of the Church be admitted to the reading public? Historiography in this period by no means consisted entirely of commissioned works written for patrons; rather, a creative interplay existed between, on the one hand, the endeavours of authors to explore the past and, on the other hand, the constraints of ideology and censorship placed on them. The Invention of Papal History sheds new light on the changing priorities, mentalities, and cultural standards that flourished in the transition from the Renaissance to the Catholic Reformation.
Salerno to Cassino Martin Blumenson 1969 Operations from the invasion of the Italian mainland near Salerno through the winter fighting up to the battles for Monte Cassino (including the Rapido River crossing) and the Anzio beachhead.
