The Tetris Effect Dan Ackerman 2016-09-06 The definitive story of a

game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which

has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American,

and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

Concept and Application of Transdisciplinarity in Intellectual

Discourse and Research

Hester du Plessis

2014-02-01 In the past four decades, transdisciplinarity has gained conceptual and practical traction for its transformative value in accounting for the complex challenges besetting humankind, including social relations and natural ecosystems. The need to develop frameworks for joint problem-solving involving diverse stakeholders is unquestionable. Besides generating inclusivity, which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of

phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more.

evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background

notes by the modern English historian Paul Harris.

IR Michael Roskin 2009
Written from Mike Roskin's unique and engaging point-of-view, IR arms students with a direct and down-to-earth understanding of contemporary international relations. This text surveys key events in world history as well as fundamental theoretical concepts to trace the international system's evolution and to assess its future. Putting the behavior of global actors into more complete context, IR helps students think critically about the challenges faced by the United States in an era of globalization.

Theology, Disability and Sport Nick J. Watson

2020-01-24 This groundbreaking book provides fascinating insights into the fast-emerging body of research that explores the relationship between sport, theology and disability within a social justice framework. In the shadow of two major sport-faith events that fore-fronted the theology of disability sport, the Vatican's international conference—Sport at the Service of Humanity and the Inaugural Global

Congress on Sports and Christianity York St John University, UK, at which Dr Brian Brock led a thematic strand on the topic—this book provides a foundation for further research and practice. This text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research: (i) 'disability sport' and (ii) the 'theology of disability'. Examples of subjects addressed in this text include: elite physical disability sport—Paralympics; intellectual disability sport—Special Olympics; equestrian sport; church, sport and disability, and; theologies of embodiment, competition and mercy. This book, written by leaders in their respective fields, begins a critical conversation on these topics, and many others,
