Riding Man Mark Gardiner 2012-07-15 For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one

of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

Gin and Tonic and Cucumber Rafaële Germain 2009 At thirty-two, Marine Vandale is still waiting for true love. The kind of love that takes your breath away, knocks you on the ground, and makes you scared and crazy all at once. "You're certainly not going to find it if you spend all your time with three guys," her mother likes to remind her. It's just that Marine, her ex Laurent, Jeff her roommate, and their best friend Julien are inseparable. Together, they're trying to navigate the troubled waters of their thirties, become real adults and tame love. But what used to seem like child's play is becoming less and less of a game, and today's mistakes are not as meaningless as the ones they made in their twenties. But each one in his or her own way continues to hope. And from date to date, from man to man, through a thousand situations she describes as "summer stock theatre," Marine persists in believing that one day she'll prove to her mother that you can't fight love.

Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)

Political Economy and the Unitive Principle T. Collins Logan 2013-05
Beginning with an innovative way to define property, T. Collins Logan explores the moral underpinnings of civil society expressed by "the unitive principle." This principle, in turn, is applied to a method of property valuation and exchange that emphasizes well-being through community-level systems and structures. T. Collins advocates for design principles and several threads of evolution that must simultaneously occur in order to achieve a more compassionate and egalitarian political economy. This is a vision that takes root in individual moral

development, and expands outward into community, regional, national and global relationships. In Political Economy and the Unitive Principle, constructive change is only possible when organic, grass roots activism coincides with top-down institutional reforms. There is considerable hope and optimism among these pages, and plentiful resources to support next steps in a more positive and productive direction. Political Economy and the Unitive Principle is a thoughtful discussion of one viable alternative to an increasingly toxic commercialist corporationism.

For the first time, these aspects are collated in book form. Care is taken to

clarify the issues, give a systematic collection of conditions which prospective solutions of these open questions have to meet, and gather and collate various useful theoretical concepts and results.
