**Freedom in the World 2015** Freedom House 2015-12-24 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 195 countries and fourteen territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical

location, ethnic or religious composition, or level of economic development.

*The Financial Crisis Inquiry Report* Financial Crisis Inquiry Commission 2011-05-01 The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to

"examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." **Revisiting Risk-Weighted Assets**  
Vanessa Le Leslé 2012-03-01 In this  
paper, we provide an overview of the  
concerns surrounding the variations  
in the calculation of risk-weighted  
assets (RWAs) across banks and  
jurisdictions and how this might  
undermine the Basel III capital  
adequacy framework. We discuss the  
key drivers behind the differences in  
these calculations, drawing upon a  
sample of systemically important  
banks from Europe, North America, and  
Asia Pacific. We then discuss a range  
of policy options that could be  
explored to fix the actual and  
perceived problems with RWAs, and  
improve the use of risk-sensitive  
capital ratios.

*Electronic Invoicing in Latin America*  
Alberto Daniel Barreix 2018-03-21 The  
electronic invoicing (EI) of taxes is  
one of Latin America's contributions  
to international taxation in support  
of the fight against evasion, global  
efforts towards tax transparency, and  
the digitization of tax  
administrations (TAs). Initially, EI  
was conceived as an instrument of  
documentary control over the  
invoicing process, so as to avert  
both the omission of sales and the  
inclusion of false purchases. The  
original idea was extended to other  
areas of tax control, such as  
payroll, goods in transit, and new  
services such as factoring. To some  
extent, EI can be regarded as the  
start of the process of digitizing  
the TAs in the broad sense. This  
publication addresses the pioneering  
experience of EI in Latin America,  
from its implementation to its  
extensions and impact on tax  
collection.

**Exploring Universal Basic Income** Ugo  
Gentilini 2019-11-25 Universal basic  
income (UBI) is emerging as one of  
the most hotly debated issues in  
development and social protection  
policy. But what are the features of  
UBI? What is it meant to achieve? How  
do we know, and what don't we know,  
about its performance? What does it  
take to implement it in practice?  
Drawing from global evidence,  
literature, and survey data, this  
volume provides a framework to  
elucidate issues and trade-offs in  
UBI with a view to help inform  
choices around its appropriateness  
and feasibility in different  
contexts. Specifically, the book  
examines how UBI differs from or  
complements other social assistance  
programs in terms of objectives,  
coverage, incidence, adequacy,

incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro-tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.

*SEC Docket* United States. Securities and Exchange Commission 1980  
Maternity and Paternity at Work Laura Addati 2014-05-13 This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and implementation. This report shows that a majority of

countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.
