Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing:

“Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy

ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Fundamentals of Physics Alessio

Mangoni 2020 This book aims to

provide solid bases for the study of

physics for the university and it is

divided into four parts, each

dedicated to a fundamental branch of

physics: quantum mechanics, theoretical physics, particle physics and condensed matter physics. In the first part we start with the concept of wave function, until the Heisenberg uncertainty principle. In the second part, after recalling the basic concepts of relativity, we treat the elementary particles and the hadrons, arriving to the notions of scattering and cross section. The third part is dedicated to the theoretical physics, where we analyze the field theory and the concepts of Lagrangian and Hamiltonian, introducing the quantum electrodynamics (QED), passing through the Klein-Gordon, Dirac and Maxwell fields. In the last part of the book we expose the basics of the condensed matter physics, including diffusion and Brownian motion, Drude and Sommerfeld models, the calculation of specific heat and the principal mechanical properties of solids, with references to lattice defects and semiconductors.

Sunburnt Country, Sweeping Pains

Graham Joseph Hill 2022-02-10 Asian immigration is transforming the Australian church and society. Migration from Asian countries occupies six of the ten largest groups migrating to Australia. While most Australian churches are declining and aging, Asian Australian churches are young and growing. The end of white Australian Christianity is near. The future of the church is Asian. Sunburnt Country, Sweeping Pains shares the stories of Asian Australian women as they experience inequality, racism, sexism, and stereotypes in ministry and mission. These women also talk about the joy and meaning they find in serving God's church and world. In this book, Graham Joseph Hill examines 21,987 NCLS surveys, 36 detailed surveys, and 15 in-depth interviews with Asian Australian Christian women. These women share their stories of discrimination and efforts to bring change. They also offer proposals for a more equal, fair, and just Australian church. Sunburnt Country, Sweeping Pains is essential reading for all who value the voices and stories of women and want to address racism and sexism in church and society. Asian Australian Christian women guide us toward a multiethnic

church that values equality and dignity for women and men of all cultures.

How to Be a Motoring Journalist Roy Lanchester 2018-04-04 For over 35 years Roy Lanchester has been one of Britain's motoring journalists. In that time he has driven, dined, drunk and laughed, all at other people's expense. In this memoir he looks back at his life and career, from his early days as a cub reporter, through his halcyon time as a Fleet Street motoring hack in the 1980s, up to his reign as one of the country's best-known and thirstiest regional journalists. Roy has always been notoriously outspoken and he holds back nothing in this book, which includes tales of his failed marriages, his rows with press officers, and his incident with Nigel Mansell, although the lawyers later asked for this to be removed. If you've ever wondered what it takes to forge a career writing about cars in the face of setbacks, cutbacks and uncooperative barmen, How To Be A Motoring Journalist will tell you everything you want to know, and some things you don't.

Red Hood Elana K. Arnold 2020-02-25 A dark, engrossing, blood-drenched tale of the familiar threats to female power—and one girl's journey to regain it. Five starred reviews greeted this powerful story from Elana K. Arnold, author of the Printz Honor winner *Damsel*. You are alone in the woods, seen only by the unblinking yellow moon. Your hands are empty. You are nearly naked. And the wolf is angry. Since her grandmother became her caretaker when she was four years old, Bisou Martel has lived a quiet life in a little house in Seattle. She's kept mostly to herself. She's been good. But then comes the night of homecoming, when she finds herself running for her life over roots and between trees, a fury of claws and teeth behind her. A wolf attacks. Bisou fights back. A new moon rises. And with it, questions. About the blood in Bisou's past, and on her hands as she stumbles home. About broken boys and vicious wolves. About girls lost in the woods—frightened, but not alone.

Drawn in Colour Vivien Hamilton 2017-10-03 The Burrell Collection in Glasgow houses more than twenty paintings, pastels, and drawings by Edgar Degas (1834-1917) that include his most recognisable motifs: ballet dancers, bathers, jockeys, and women at work. Together with a selection of the National Gallery's oils and pastels, they represent every stage of Degas's career. The authors show how the immediacy of these works is enhanced by the artist's energetic technique. These are not so much spontaneous sketches as daring experiments in form and color. Essays explore Degas's innovative use of pastels; his career and the ongoing critical assessment of his art; and the life and milieu of his contemporary Sir William Burrell, the wealthy Scottish shipping magnate and philanthropist, for whom forming this impressive collection of Degas's works was an unusual foray into contemporary art.
