Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Psychosphere Brian Lumley 2001-10-17 After Richard Garrison lost his sight in a terrorist explosion, he developed vast mental powers that more than compensated for his blindness. He mastered the Psychomech machine, then used it to conquer his enemies and restore his dead love to full and vibrant life. Psychomech also revealed to Garrison the Psychosphere, a startling reality where mental powers reigned supreme and could influence people and events on Earth. Once he was nearly godlike-or demonic, if one dared become his enemy-but now Garrison's mental abilities grow weaker with each use. He tries desperately to conserve his energies, but he has begun to have strange visions of a mind so different from his own as to be other than human, and knows he must stay alert and strong. Charon Gubwa has invaded the Psychosphere. Twisted and evil, sexually and mentally warped, physically corrupt, Gubwa's desires are simple: More. More drugs. More sex. More power. More of the Earth under his dominion. Richard Garrison must battle Gubwa in the Psychosphere and on Earth. And he must win, no matter the cost to himself or those he loves, or all mankind will be lost. Underwater Dogs Seth Casteel 2012-10-23 The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In Underwater Dogs, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.

Psychophysical Judgment and Measurement Edward Carterette 2012-12-02 Handbook of Perception, Volume II: Psychophysical Judgment and Measurement brings together a very large, diverse, and widely scattered literature on human perception, with emphasis on psychophysical judgement and measurement. The book reviews the history of research on choice, judgement, and measurement in order to provide a background for contemporary work. This volume is organized into five sections encompassing 14 chapters and begins with a historical background on psychophysics and the evolution of thinking about the central measurement problem in judgement. The basic psychological context in which choice and judgement occur is considered next, touching on topics such as the problem of information selection and the sources of bias and variability in judgemental processes in relation to memory. The chapters that follow discuss the theoretical frame of measurement models and their applications. In particular, examples of algebraic fundamental measurement, algebraic derived measurement, and probabilistic derived measurement are given. The book also introduces the reader to various psychophysical scaling methods and theories of scaling. This book will serve as a basic source and reference work for psychologists and natural scientists, as well as for anyone in the arts or sciences or those who are interested in human perception.

Public Television For Sale William Hoynes 2019-09-16 Public television is uniquely positioned in our country to contribute to the invigoration of democratic public life because, ostensibly, it is neither driven by the market nor dominated by the state. In this comprehensive analysis of the forces that shape our public television system, sociologist William Hoynes finds that public television increasi

Beat the Forex Dealer Agustin Silvani 2009-08-07 The foreign-exchange market is often referred to as the Slaughterhouse where novice traders go to get 'chopped up'. It is one of egos and money, where millions of dollars are won and lost every day and phones are routinely thrown across hectic trading desks. This palpable excitement has led to the explosion of the retail FX market, which has unfortunately spawned a new breed of authors and gurus more than happy to provide misleading and often downright fraudulent information by promising traders riches while making forex trading 'easy'. Well I'll let you in on a little secret: there is nothing easy about trading currencies. If you don't believe me then stop by Warren Buffet's office and ask him how he could lose \$850m betting on the dollar or ask George Soros why his short yen bets cost him \$600m not once but twice in 1994. What's wrong with these guys, don't they read FX books? In reality, the average client's trading approach combined with the unscrupulous practices of some brokers make spot FX trading more akin to the games found on the Vegas strip than to anything seen on Wall St. The FX market is littered with the remains of day traders and genius 'systems,' and to survive in the long-run traders have to realize that they are playing a game where the cards are clearly stacked against them. Have you ever had your stop hit at a price that turned out to be the low/high for the day? Bad Luck perhaps? Maybe. What if it happens more than once? Do you ever feel like the market is out to get you? Well guess what, in this Zero Sum game it absolutely is. Covering the day-to-day mechanics of the FX market and the unsavory dealings going on, Beat the Forex Dealer offers traders the market-proven trading techniques needed to side-step dealer traps and develop winning trading methods. Learn from an industry insider the truth behind dirty dealer practices including: stop-hunting, price shading, trading against clients and 'no dealing desk' realities. Detailing the dealer-inspired trading techniques developed by MIGFX Inc, consistently ranked among the world's leading currency trading firms, the book helps turn average traders into winning traders; and in a market with a 90% loss rate winning traders are in fact quite rare! More than just a simple manual, Beat the Forex Dealer brings to life the excitement of the FX market by delivering insights into some of the greatest trading triumphs and highlighting legendary disasters; all written in an easy to read style. Make no mistake about it there is a lot of money to be made in currency trading, you just have to know where to look. Sidestepping simple dealer traps is one way of improving your daily p&l, but it is surely not the only one. Successful trading comes down to taking care of the details, which means skipping the theoretical stuff and providing only up-to-date, real-life examples while sharing the FX trading tips that have proved so profitable over the years. By stripping away the theory and getting down to the core of trading, you too will find yourself on the way to beating the forex dealer!

Japanese Tales of Mystery and Imagination Edogawa Rampo 2012-05-10 This collection of mystery and horror stories is regarded as Japan's answer to Edgar Allan Poe. Japanese Tales of Mystery & Imagination, the first volume of its kind translated into English, is written with the quick tempo of the West but rich with the fantasy of the East. These nine bloodcurdling, chilling tales present a genre of literature largely unknown to readers outside Japan, including the strange story of a quadruple amputee and his perverse wife; the record of a man who creates a mysterious chamber of mirrors and discovers hidden pleasures within; the morbid confession of a maniac who envisions a career of foolproof "psychological" murders; and the bizarre tale of a chair-maker who buries himself inside an armchair and enjoys the sordid "loves" of the women who sit on his handiwork. Lucid and packed with suspense, Edogawa Rampo's stories found in Japanese Tales of Mystery & Imagination have enthralled Japanese readers for over half a century. Mystery stories include: The Human Chair The Caterpillar Two Crippled Men The Traveler with the Pasted Rag Picture

Psychology of the Image Michael Forrester 2012-12-06 Psychology of the Image outlines a theoretical framework bringing together the semiotic concepts developed by Charles Peirce, the sociological insights of Ervin Goffman and the psychoanalytic ideas of Jacques Lacan. Image studies in fashion, advertising, photography, film studies and psychology have been influenced by these theorists in significant ways. The framework presented helps the reader understand how these ideas relate to the study of different domains of the image: the internal imagery of dreams, external images such as the photograph and image processes which span both contexts, e.g., images we have about ourselves. The topics discussed are organised into three themes. The first considers mental imagery, including sound and dreams. The second addresses the interdependent nature of internal and external images, e.g., the gendered self and social identity. In the third theme, attention turns to external images including television, film,

photography, the computer and the internet. Psychology of the Image will be of interest to undergraduates, postgraduates, lecturers and researchers in the fields of psychology, media studies and sociology.

Psychology; Or, a View of the Human Soul Frederick August Rauch 1840 "The principal object of the author in writing this book, was to render this noble and delightful science accessible to all classes of readers. A second object of the author was to give the science of man a direct bearing upon other sciences, and especially upon religion and theology. Psychology and theology are connected by their common subject, which is man. The present work is, as far as the author knows, the first attempt to unite German and American mental philosophy. This design has not been executed by bringing together two separate systems or by forming an eclectic compound, which is neither the one nor the other, and the parts of which do not grow forth from one spirit, but are brought together from different sources and united by the writer--a real sphinx in the sphere of science"--Preface. Concept and Application of Transdisciplinarity in Intellectual Discourse and Research Hester du Plessis 2014-02-01 In the past four decades, transdisciplinarity has gained conceptual and practical traction for its transformative value in accounting for the complex challenges besetting humankind, including social relations and natural ecosystems. The need to develop frameworks for joint problem-solving involving diverse stakeholders is unquestionable. Besides generating inclusivity, which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more.

Psychology Third Canadian Edition Daniel L. Schacter 2014-07-01 Schacter, Gilbert, Wegner, and Nock's Psychology, Third Edition is widely acclaimed for captivating students with contemporary psychology research on the major topics of the introductory course, while helping them develop critical thinking skills that will stay with them beyond the course term. Expert coverage of the DSM-5, quirky examples of thinking gone awry, scenarios based on common psychological misconceptions, and contributions from new co-author Matthew Nock highlight the new edition. And now, this breakthrough text is available in a version created just for Canadian students and teachers. It offers the same fascinating writing, helpful study tools, and keen eye for intriguing stories as Psychology, Third Edition, but with a wide range of Canadian examples and impactful work by Canadian researchers incorporated throughout. Welcome Canadian author, Ingrid Johnsrude Ingrid's principal area of investigation is the neural basis of understanding speech, and she leads experiments examining how utterances are transformed into acoustic signals and then into meaning via a variety of cognitive processes. Her investigations span multiple levels—from understanding the brain structures involved in hearing and comprehension to observing the ways listeners deal with challenges such as background noise.

Loose-leaf Version for Psychology: The Science of Person, Mind, and Brain Daniel Cervone 2015-01-28 In Psychology: The Science of Person, Mind, and Brain, experienced teacher, researcher, and author Daniel Cervone provides students with a new and exciting way of understanding psychology. Cervone organizes material around three levels of analysis -- person, mind, and brain -- and employs a person-first format that consistently introduces topics at the person level: theory and research on the lives of people in sociocultural contexts. Students are able to make sense of the latest research through what they understand best: people. With fellow teacher and researcher Tracy Caldwell, Cervone has conceived a text beyond the print experience from the ground up, integrating online immersive research experiences and assessment tools that capitalize on research findings on pedagogy and student learning (e.g., the testing effect). Pedagogical Author, Tracy L. Caldwell Working closely with Daniel Cervone, fellow teacher and researcher Tracy Caldwell of Dominican University developed the book's pedagogical program from the Preview Questions at the beginning of each section to the Self-Tests at the end of each chapter. The pedagogy is designed to engage students at multiple levels of Bloom's taxonomy and at multiple points in each chapter. *Public Management and Governance in Malaysia* Noore Alam Siddique 2013-01-17 The past two and a half decades have seen major transformations in public sector management and governance across the globe. This book examines the ways public sector management and governance in Malaysia has changed and is changing under contemporary reform models. Chapters are written by well-established scholars and academics with intimate knowledge in their respective fields, and provide a thorough and insightful analysis of the reform trends and developments on a range of topics. These include performance management, compensation reforms, public budgeting, accounting and reporting, privatisation and public-private partnership, e-government, managing ethics and accountability, local government and inter-governmental relations. While the book surveys the topics that are central to public sector management and governance, it also focuses on the nature of reforms and changes that were introduced, as well as the forces that have shaped their design and implementation process, and the initial impacts and results. Overall, the book provides students and scholars of Politics and Southeast Asian Studies with a greater appreciation and deeper understanding of the recent developments and current trends of public sector management.

Public Administration Marc Holzer 2015-09-16 Marc Holzer and Richard W. Schwester have written a fresh and highly engaging textbook for the introductory course in Public Administration. Their coverage is both comprehensive and cutting-edge, including not only all the basic topics (OT, budgeting, HRM), but also reflecting new realities in public administration: innovations in e-government, the importance of new technology, changes in intergovernmental relations, especially the emphasis on inter-local and shared regional resources, and public performance and accountability initiatives. Public Administration has been crafted with student appeal in mind. Each of the book's chapters is generously illustrated with cartoons, quotes, and artwork—all reinforcing the book's theme that the field of public administration is rooted in the cultural and political world. Each chapter is also supported with a listing of key terms, exercises, and additional resources. The textbook is supported by one of the most comprehensive and easy-to-use instructors' manuals of any introductory text on the market today. It contains full lesson plans with activities to accommodate a broad range of teaching and learning styles for each chapter, PowerPoint decks for each chapter (with visuals and links embedded), 8 new long-term project / student presentation ideas, an updated 'Quotes and Notables' section with biographical information and media links for each chapter, updated test questions with answer keys, and updated terms and definitions for each chapter.

The Impact of You Kendall Ryan 2015-06-04 ****New Adult Romance**** Needing an escape from her past, Avery chooses a college where no one knows her. Keeping a low profile was the plan, falling for the intense frat boy, Jase wasn't. Yet she can't deny how alive she feels when he's near. Even as common sense implores her to stay away, her body begs her to get closer. Jase, numb from his own family drama, has grown bored with weekends fueled by nameless girls and countless bottles when he meets Avery. Helping her cope with her past is better than dealing with the bullshit his own life's served up. Determined to drive away the painful secret she's guarding, he appoints himself her life coach, and challenges her to new experiences. Getting close to her and being the one to make her smile are simply perks of the job. But when Avery's past boldly saunters in, refusing to be forgotten, can Jase live with the truth about the girl he's fallen for? Recommended for 17+ due to mature themes and sexual content. *Publics and the City* Kurt Iveson 2011-07-22 Publics and the City investigates struggles over the making of urban publics, considering how the production, management and regulation of 'public spaces' has emerged as a problem for both urban politics and urban theory.
