Positive Lightning Laurie Salzler 2014-12-15 Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find

someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and where least expected . . . no matter who's in its path."

Mercy's Rain Cindy K. Sproles 2015-01-06 When your life is built around a father's wrath, how can you trust in the love of Father God? Mercy Roller

knows her name is a lie: there has never been any mercy in her young life. Raised by a twisted and abusive father who called himself the Pastor, she was abandoned by the church community that should have stood together to protect her from his evil. Her mother, consumed by her own fear and hate, won't stand her ground to save Mercy either. The Pastor has robbed Mercy of innocence and love, a husband and her child. Not a single person seems capable of standing up to the Pastor's unrestrained evil. So Mercy takes matters into her own hands. Her heart was hardened to love long before she took on the role of judge, jury, and executioner of the Pastor. She just didn't realize the retribution she thought would save her, might turn her into the very thing she hated most. Sent away by her angry and grieving mother, Mercy's path is unclear until she meets a young preacher headed to counsel a pregnant couple. Sure that her calling is to protect the family, Mercy is drawn into a different life on the other side of the mountain where she

slowly discovers true righteousness has nothing evil about it—and that there might be room for her own stained and shattered soul to find shelter. . . and even love. Mercy's Rain is a remarkable historical novel set in 19th century Appalachia that traces the thorny path from bitterness to forgiveness and reveals the victory and strength that comes from simple faith.

Kinship Matters Fatemeh Ebtehaj 2006-09-15 This book is the fifth in the Cambridge Socio-Legal Group series and it concerns the evolving notions and practices of kinship in contemporary Britain and the interrelationship of kinship, law and social policy. Assembling contributions from scholars in a range of disciplines, it examines social, legal, cultural and psychological questions related to kinship. Rising rates of divorce and of alternative modes of partnership have raised questions about the care and well-being of children, while increasing longevity and mobility, together with lower birth rates and changes in our economic circumstances, have led to a

reconsideration of duties and responsibilities towards the care of elderly people. In addition, globalisation trends and international flows of migrants and refugees have confronted us with alternative constructions of kinship and with the challenges of maintaining kinship ties transnationally. Finally, new developments in genetics research and the growing use of assisted reproductive technologies may raise questions about our notions of kinship and of kin rights and responsibilities. The book explores these changes from various perspectives and draws on theoretical and empirical data to describe practices of kinship in contemporary Britain.

Rethinking Clusters Luciana Lazzeretti
2021-05-13 Research on the topic of clusters and industrial districts is very extensive. However, most of it has focused more on understanding the past than on trying to map out the future. The aim of this book is to fill this gap by identifying and discussing the main research

topics that populate the current scientific debate and highlight the emergent lines of research that will constitute the future research agenda. It does so by drawing on the debate started with the "rethinking clusters" workshops, which in a short time have become a rich place for discussion among cluster scholars around the world. *Rethinking Clusters: Towards a New Research Agenda for Cluster Research* collects contributions from authoritative colleagues, who cover a number of relevant and timely issues, such as the territorial roots of radical innovation processes, new ways of understanding and measuring the role of place in economic development, path renewal, internationalization and entrepreneurship. The final section is devoted to the critical analysis of policies that support smart specialization. The chapters in this book were originally published as a special issue of the journal *European Planning Studies*.

Emerging Issues in Intellectual Property
Guido Westkamp 2007 . . . the book is a well-

presented collection of scholarly articles on diverse, stimulating topics. . . The levels of explanation and detail vary from chapter-to-chapter and so the reader will probably find the book most helpful to consult for key topics of interest. . . The breadth of the book means that students, academics and interested practitioners should find areas that will appeal. Frederick Chen, European Intellectual Property Review Together the essays cover some of the most topical issues in IP and related fields, and should therefore be of immense interest and value to any serious student of the subject. The Commonwealth Lawyer It is an extremely thought-provoking book, crammed full of excellent papers which are genuinely original, and push forward the boundaries of their retrospective topics. . . the book is without doubt worth purchasing for anyone interested in IP theory, pharmaceuticals or traditional knowledge. . . the papers are of incredibly good quality. . . a few of those alone make the book worth

purchasing. My impromptu rating system will therefore award it 5 out of 5 stars. James Griffin, Communications Law This book covers an extensive range of critical issues in modern Intellectual Property (IP) law under three broad headings: Technology, Market Freedom and the Public Domain; Intellectual Property and International Trade; Traditional Knowledge, Technology and Resources. Uniting contributions at the cutting edge of IP research, the authors, all former or current members and associates of the Queen Mary Intellectual Property Research Institute, University of London, address a number of diverse topics in relation to existing copyright, trademark and patent law. They examine political and juridical issues in fields such as geographical indications and traditional knowledge, agriculture and information technology, pharmaceuticals and access to medicines, human rights and IP strategy. The book will appeal to academics, researchers, students, and to practitioners concerned with all areas of intellectual property.

Jeep TJ 1997-2006 Michael Hanseen
2018-08-15 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} The Jeep CJ, the icon that started it all, is the most popular off-road vehicle of all time. The look, style, and functionality of the CJ made it instantly popular and recognizable the world over, in no doubt partly due to its military presence in World War II. The Jeep Wrangler platform had the difficult task of replacing the extremely popular CJ platform. Outwardly similar in appearance, the YJ, TJ, and JK that followed all had significant design improvements, as can be expected when a platform has a life span of more than five

decades. The YJ was the first Chrysler release after it purchased AMC in the mid-1980s, and it was aimed at taming the original CJ for more comfort and, arguably, a larger audience. The TJ that followed next was an evolutionary update, significant in that it featured a coil spring suspension and the celebrated return of round headlights, for a more traditional look compared to the square lights of the YJ. In Jeep TJ 1997-2006: How to Build & Modify, everything you need to know about how to modify your TJ for off-road use is covered. Beginning with why you should choose a TJ for modification, Jeep expert Michael Hanssen takes you through all the different systems needing modification, including engine modifications and swaps, transmission swaps, transfer case and driveshafts modifications, axles and traction systems, suspensions and lifts, wheels, tires, brakes, chassis protection, electrical, and winches. Included in every chapter are step-by-step modification instructions to help walk you

through the process. If you want to build a TJ for serious off-road trail use, or you just want a capable and great-looking Jeep for around town, this book has you covered.

Big Data Nathan Marz 2015 Summary Big Data teaches you to build big data systems using an architecture that takes advantage of clustered hardware along with new tools designed

specifically to capture and analyze web-scale data. It describes a scalable, easy-to-understand approach to big data systems that can be built and run by a small team. Following a realistic example, this book guides readers through the theory of big data systems, how to implement them in practice, and how to deploy and operate them once they're built. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Book Web-scale applications like social networks, real-time analytics, or e-commerce sites deal with a lot of data, whose volume and velocity exceed the limits of traditional database systems. These applications require architectures built around clusters of machines to store and process data of any size, or speed. Fortunately, scale and simplicity are not mutually exclusive. Big Data teaches you to build big data systems using an architecture designed specifically to capture and analyze web-scale data. This book presents the Lambda Architecture, a scalable,

easy-to-understand approach that can be built and run by a small team. You'll explore the theory of big data systems and how to implement them in practice. In addition to discovering a general framework for processing big data, you'll learn specific technologies like Hadoop, Storm, and NoSQL databases. This book requires no previous exposure to large-scale data analysis or NoSQL tools. Familiarity with traditional databases is helpful. What's Inside Introduction to big data systems Real-time processing of web-scale data Tools like Hadoop, Cassandra, and Storm Extensions to traditional database skills About the Authors Nathan Marz is the creator of Apache Storm and the originator of the Lambda Architecture for big data systems.
