*Parentology* Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

**Electrophysiologic Evaluation in Otolaryngology** Bobby Ray Alford 1997-01-01 The past decade has seen a rapid increase in the application of electrophysiologic measurement techniques in evaluating patients with hearing and balance disorders. Advances in computer technology have generated new and exciting applications in the areas of electrocochleography, electroneuronography, electronystagmography, and the auditory brainstem response. This book examines these recent developments and explores new areas of the field currently under investigation. An important issue in electrocochleography today is the widened AP-SP complex. Contributors to this book evaluate its significance in patients with cerebellopontine angle tumor. The many applications of the auditory brainstem response are surveyed, as well as the current status of the mid- and long-latency evoked responses. An overview of the relatively new area of otoacoustic emissions and its clinical applications is also included. Practicing otolaryngologists, otolaryngology residents, audiologists, audiology students, and auditory and vestibular scientists will benefit most from this well-researched book.

*Never Far Away* Michelle Rodriguez 2013-11-01 Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day.

John Haynes 2011-01-01 Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.
