Mindful_Tech David M. Levy 2016-01-28 From email to smart phones, and from social media to Google searches, digital technologies have transformed the way we learn, entertain ourselves, socialize, and work. Despite their usefulness, these technologies have often led to information overload, stress, and distraction. In recent years many of us have begun to look at the pluses and minuses of our online lives and to ask how we might more skillfully use the tools we’ve developed. David M. Levy, who has lived his life between the “fast world” of high tech and the “slow world” of contemplation, offers a welcome guide to being more relaxed, attentive, and emotionally balanced, and more effective, while online. In a series of exercises carefully designed to help readers observe and reflect on their own use, Levy has readers watch themselves closely while emailing and while multitasking, and also to experiment with unplugging for a specified period. Never prescriptive, the book opens up new avenues for self-inquiry and will allow readers—in the workplace, in the classroom, and in the privacy of their homes—to make meaningful and powerful changes.

Geoheritage and Geotourism Thomas A. Hose 2016 Europe's engagement from the late sixteenth century onwards in scientific Earth science inquiry has generated numerous and varied collections of minerals, rocks, and fossils, together with their associated archives, artworks and publications, forming a rich cultural geoheritage held in major private and especially royal and aristocratic collections, museums, universities, archives and libraries. The mines, quarries, geological structures, landforms, minerals, rocks and fossils - or geodiversity - that underpin these collections populate past and present-day Earth science literature. However, for too long their scientific, historic and cultural significance was not universally recognised and generally they were not accorded adequate resources and protection - or geoconservation. Hence, geotourism was developed in the 1990s to raise public awareness of Europe's geoheritage and geodiversity and to promote its geoconservation; the volume's theoretical essays and case studies examine these four core goeelements and provide a timely introduction for anyone interested in natural history museums, countryside management, and landscape-based tourism. Dr Thomas A. Hose is an Honorary Research Associate in the School of Earth Sciences, University of Bristol. He has pioneered the recognition of and research into geotourism, and is the author of the world's first doctoral thesis on the subject. Contributors: Kevin Crawford, Peter Davis, John E. Gordon. The History of the Lewis and Clark Expedition Meriwether Lewis 1979 Here is the whole story as summarized by Biddle: encounters with dozens of Indian tribes; descriptions of their political and social organization, dress, living habits and ways; personal anecdotes of courage and stamina; vivid descriptions of staggering natural wonders that no white man had ever seen. Here, too, is all the material that Coues added: chapter synopses; critical footnotes that clarify hundreds of obscure references, add important biological data, provide modern locations of camp and exploration sites, bring into account additional material from the manuscript journal, and correct countless errors; a bibliographical introduction; brief Memoirs of Clark and the expedition's sergeant, Patrick Gass; a modern map to supplement Lewis and Clark's originals; and a much-needed index.

The Fear of French Negroes Sara E. Johnson 2012-10-10 The Fear of French Negroes is an interdisciplinary study that explores how people of African descent responded to the collapse and reconsolidation of colonial life in the aftermath of the Haitian Revolution (1791-1845). Using visual culture, popular music and dance, periodical literature, historical memoirs, and state papers, Sara E. Johnson examines the migration of people, ideas, and practices across imperial boundaries. Building on previous scholarship on black internationalism, she traces expressions of both aesthetic and experiential transcolonial black politics across the Caribbean world, including Hispaniola, Louisiana and the Gulf South, Jamaica, and Cuba. Johnson examines the lives and work of figures as diverse as armed black soldiers and privateers, female performers, and newspaper editors to argue for the existence of “competing inter-Americanisms” as she uncovers the struggle for unity amidst the realities of class, territorial, and linguistic diversity. These stories move beyond a consideration of the well-documented anxiety insurgent blacks occasioned in slaveholding systems to refocus attention on the wide variety of strategic alliances they generated in their quests for freedom, equality and profit.

Ecological Resilience and Complexity Elizabeth Campbell 2009 This Technical Report is one of a series of foundation papers for the British Columbia Ministry of Forests and Range's Future Forest Ecosystems Initiative (FFEI). The series of foundation papers will increase awareness about the potential impact of climate change on forest range resources in British Columbia. It will also provide information to help assess the vulnerability of British Columbia's forest and range resources to climate change and guide the development of adaptation strategies.7This report summarizes the theory of ecological resilience and explores how this aspect of complex system science provides guidance for managing forests in a changing climate.

Natural Resources And Development In Arid Regions Enrique Campos-Lopez 2019-03-08 In this book, the authors integrate various perspectives on the evaluation of natural resources in arid and semiarid zones, analyze development options, and discuss systems analysis tools that could be important for the management of technology.

Return to Reason Stephen Edelston Toulmin 2009-06-30 Stephen Toulmin argues that the potential for reason to improve our lives has been hampered by a serious imbalance in our pursuit of knowledge. The centuries-old dominance of rationality has diminished the value of reasonableness. Toulmin issues a powerful call to redress the balance between rationality and reasonableness.

Landscape and Memory Simon Schama 1996 This book examines our relationship with the landscape around us - rivers, mountains, forests - the impact that each of them has had on our culture and imaginations, and the way in which we, in turn, have shaped them to suit our needs.

Roots of Wisdom, Branches of Devotion Fabrizio M. Ferrari 2016 Plant life has figured prominently in Indian culture. Archaeobotanical findings and Vedic texts confirm that plants have been central not only as a commodity (sources of food; materia medica; sacrificial matter; etc.) but also as powerful and enduring symbols. Roots of Wisdom, Branches of Devotion: Plant Life in South Asian Traditions explores how herbs, trees, shrubs, flowers and vegetables have been studied, classified, represented and discussed in a variety of Indian traditions such as Vedism, Hinduism, Jainism, Buddhism, indigenous cultures and Islam. Moving from an analysis of the sentience of plants in early Indian philosophies and scientific literature, the various chapters, divided in four thematic sections, explore Indian flora within devotional and mystic literature (bhakti and Sufism), mythological, ritual and sacrificial culture, folklore, medicine, perfumery, botany, floriculture and agriculture. Arboreal and floral motifs are also discussed as an expression of Indian aesthetics since early coinage to figurative arts and literary figures. Finally, the volume reflects current discourses on environmentalism and ecology as well as on the place of indigenous flora as part of an ancient yet still very much alive sacred geography.

Production And Operations Management S. Anil Kumar 2006 This Book Presents Lucid Treatment Of A Wide Range Of Issues Involved In Production And Operations Management. It Focuses On The Latest Techniques In Production Planning And Control Considered To Be Pivotal For Organizations, Which Aim At Maximizing Their Productivity And Profitability.The Book Further Discusses In Detail The Production System Concept, Facility Location, Plant Layout Design, Production Scheduling, Mass Production Techniques Such As Assembly Line Balancing Maintenance Planning And Control, Scheduling, Quality Control; And Modern Production Management Tools That Include Cim, Tqm And Iso 9000 Series.Primarily Designed As A Textbook For Various Courses Like Bbm, Bba, B.Com., Mba And Also Useful For Students Pursuing Courses, Production And Operations Management, Mechanical, Industrial And Production Engineering Of Bangalore And Other Indian Universities.Salient Features:
* Book Is Written In Simple And Lucid Style
* Contents Are Presented In A Most Meticulous Manner
* Charts Are Provided For Easy Understanding Of The Concepts
* Exercises Are Designed For Self-Evaluation And Include Objective Type, Analytical Type And Application Type Questions
* Contains Examination Question Bank
* Contains Exhaustive Glossary Of Terminologies
* Focuses On Materials Management Concepts And Techniques
* Focuses On Plant Location And Layout Concepts
* Focuses On Statistical Quality Control Concepts And Technique
* Focuses On Industrial Engineering Concepts Such As Time Motion Study, Maintenance Management, Waste Management & Automation

Fundamentals of Tree-ring Research James H. Speer 2010 This comprehensive text addresses all of the subjects that a reader who is new to the field will need to know and will be a welcome reference for practitioners at all levels. It includes a history of the discipline, biological and ecological background, principles of the field, basic scientific information on the structure and growth of trees, the complete range of dendrochronology methods, and a full description of each of the relevant subdisciplines.

The Evolution of Religion Joseph Abdul Bulbulia 2008 The Evolution of Religion is a unique transdisciplinary volume that gathers the latest research, debates, and programmatic visions of scholars studying religion from an evolutionary perspective. Criminal Poisoning John H. Trestrail, III 2007-10-28 In this revised and expanded edition, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court, and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general and their victims. The Appendix has been updated to include the more commonly used poisons, as well as the use of antifreeze as a poison.

The Sabra Oz Almog 2000-11-28 The Sabras were the first Israelis—the first generation, born in the 1930s and 1940s, to grow up in the Zionist settlement in Palestine. Socialized and educated in the ethos of the Zionist labor movement and the communal ideals of the kibbutz and moshav, they turned the dream of their pioneer forebears into the reality of the new State of Israel. While the Sabras made up a small minority of the new society’s population, their cultural influence was enormous. Their ideals, their love of the land, their recreational culture of bonfires and singalongs, their adoption of Arab accessories, their slang and gruff, straightforward manner, together with a reserved, almost puritanical attitude toward individual relationships, came to signify the cultural fulfillment of the utopian ideal of a new Jew. Oz Almog’s lively, methodical, and convincing portrayal of the Sabras addresses their lives, thought, and role in Jewish history. The most comprehensive study of this exceptional generation to date, The Sabra provides a complex and unflinching analysis of accepted norms and an impressive appraisal of the Sabra, one that any examination of new Israeli reality must take into consideration. The Sabras became Palmach commanders, soldiers in the British Brigade, and, later, officers in the Israel Defense Forces. They served as a source of inspiration and an object of emulation for an entire society. Almog’s source material is rich and varied: he uses poems, letters, youth movement and army newsletters, and much more to portray the Sabras’ attitudes toward the Arabs, war, nature, work, agriculture, cooperation, and education. In any event, the Sabra remained central to the founding myth of the nation, the real Israeli, against whom later generations will be judged. Almog’s pioneering book juxtaposes the myths against the realities and, in the process, limns a collective profile that brilliantly encompasses the complex forces that shaped this remarkable generation.

The Thin Green Line Ontario Forest Research Institute 2005 Forest regeneration is a cornerstone of managing forests sustainably. Prompt and efficient regeneration gives society the benefits of wood products, as well as the economic wealth that obtaining and processing wood creates. Good reforestation habits provide more wood from less land and increased timber productivity means that demand for wood products can be met with less impact on non-wood uses of the forest. This symposium which was attended by nearly 200 professionals included participants from Canada, the United States, Europe, and Asia had as its focus the issue of forest regeneration which is a cornerstone of managing forests sustainably. Papers presented cover a range of topics related to reforestation within the broader categories of: the status of reforestation and afforestation around the world; nursery methodologies to produce target seedlings; planting and planting site treatments to optimize regeneration; and enhancing timber production and non-timber values through stand establishment.--Document.

English for Everyone: Teacher's Guide DK 2018-06-05 An essential teacher's companion to an innovative, uniquely visual English-language course, this e-guide helps English teachers—including those for whom English is not their native language--create clear, focused lesson plans, explain difficult concepts in a simple and concise way, and make language learning exciting, intuitive, and incredibly easy. This teacher's e-guide is designed to accompany English for Everyone, a comprehensive course in English as a foreign language for adults. English for Everyone combines innovative and systematic visual teaching methods with the best of DK design to make the English language easy to understand and learn. Key language skills, grammar rules, and vocabulary are reinforced with listening, speaking, reading, and writing exercises, available in print and digital formats. The English for Everyone Teacher's Guide helps busy classroom teachers or one-on-one tutors get the most out of using the course with their students. Its step-by-step guide to the crystal-clear, tightly structured teaching method shows teachers how to explain even the trickiest points of English in an engaging, easy-to-follow way. It also includes instructions for the series' highly versatile exercises, which are primarily suitable for homework, independent study, or one-on-one tutoring, but are readily adapted for classroom or group activities.

Common Forest Trees of Hawaii Elbert Little 2016-09-24 Common Forest Trees of Hawaii, first published in 1989 as USDA Forest Service Agriculture Handbook 679, is an illustrated reference for identifying the common trees in the forests of Hawaii. Useful information about each species is also compiled, including Hawaiian, English, and scientific names; description; distribution within the islands and beyond; uses of wood and other products; and additional notes. The 152 species described and illustrated by line drawings comprise 60 native species (including 53 that are endemic), 85 species introduced after the arrival of Europeans, and 7 species introduced apparently by the early Hawaiians. One chapter is devoted to forests and forestry in Hawaii. Maps of the Hawaiian Islands show the physical features and place names, major forest types, and forest reserves and conservation districts. Each tree species is illustrated by a full-page line drawing.

Foundations of Inventory Management Paul Zipkin 2000-01-24 Foundations of Inventory Management presents a complete treatment of inventory theory and models for use in advanced undergraduate, masters, or PhD courses in Operations research, manufacturing management or Operations management. Coverage is organized into an introductory section, followed by a section focused on predictable supply and demand, and the third section covering stochastic inventory models. Many recent developments related to or impacting inventory such as ERP systems, supply chain management, JIT, and ERP systems are integrated within the text. The text presents inventory as a critical topic for virtually all businesses today and one in which theory and practice are closely linked. Prerequisite coursework for students of this text would include basic optimization theory, stochastic processes, and dynamic programming. The text includes examples as well as rigorous assignment problem sets.

Golf in the Kingdom Michael Murphy 2011-06-07 A spiritual journey, a lush travelogue, a parable of sports and philosophy—John Updike called this unique novel “a golf classic if any exists in our day.” When an American traveler on his way to India stops to play a round on one of the most beautiful and legendary golf courses in Scotland, he doesn’t know that his game—and his life—are about to change forever. He is introduced to Shivas Irons, a mysterious golf pro whose sublime insights stick with him long after the eighteenth hole. From the first swing of the Scotsman’s club, he realizes he is in for a most extraordinary day. By turns comic, existential, and semiautobiographical, Michael Murphy’s tale traces the arc of twenty-four hours, from a round of golf on the Links of Burningbush to a night fueled by whiskey, wisdom, and wandering—even a sighting of Seamus MacDuff, the holy man who haunts the hole they call Lucifer’s Rug. “Murphy’s book is going to alter many visions,” The New York Times Book Review declared. More than an unforgettable approach to one of the world’s most popular sports, Golf in the Kingdom is a meditation on the power of a game to transform the self.

Veterinary Virology Mel Roth 2016-05-25 Virology mainly focuses on the study of viruses which have a significant impact on living organisms. This book on veterinary virology provides comprehensive insights into various diseases which affect animals, like rhabdovirus, pestivirus, foot and mouth disease virus, etc. Suitable for the students and researchers of veterinary medicine and veterinary pathology, it will be a useful tool in comprehending various viral infections and their treatment. The book will also provide innovative topics for research which interested readers can take up.

The Tree Experts Mark Johnston 2021-08-31 Trees are now in the public eye as never before. The threat of tree diseases, the felling of street trees, and the challenge of climate change are just some of the issues that have put trees in the media spotlight. At the same time, the trees in our parks, gardens, and streets are a vital resource that can deliver environmental, social, and economic benefits that make our towns and cities attractive, green, and healthy places. Ever since Roman times when amenity trees were first planted in Britain, caring for those trees has required specialist skills. This is mainly because of the challenges of successfully integrating large trees into the urban environment and the risks involved in working with them, often at height and in close proximity to people, buildings and roads. But who are the people with the specialist expertise to care for our amenity trees? While professionals such as horticulturists, landscape architects, conservationists and foresters have a role to play, it is the arboriculturists who are the 'tree experts'. For centuries arboriculture was often synonymous with forestry or considered an aspect of horticulture, until it emerged in the nineteenth century as a separate discipline. There are now some 22,000 people employed in Britain's arboricultural industry, including practical tree surgeons and arborists, local authority tree officers, and arboricultural consultants. This is the first book to trace the history of Britain's professional tree experts, from the Roman arborator to the modern chartered arboriculturist. It also discusses the influences from continental Europe and North America that have helped to shape British arboriculture over the centuries. The Tree Experts will have particular appeal to those interested in the natural and built environment, heritage landscapes, social history, and the history of gardening.

Tropical Forestry Handbook Laslo Pancel 2015-12-14 This book provides a cross-section of all outstanding experience in all fields of tropical forestry under a drastically changing environment induced by climate change. It sheds light on the existing know-how and presents it in a concise and efficient way for the scientist and professional in charge of planning, implementing and evaluating forest resources. The Tropical Forestry Handbook provides proven and/or promising alternative concepts which can be applied to solve organizational, administrative and technical challenges prevailing in the tropics. Presented are state of the art methods in all fields concerning tropical forestry. Emphasize is given to methods which are adapted to- and which safeguard - environmental conditions.

Understanding Movies Louis D. Giannetti 1999 An introduction to the art of the film, emphasizing an aesthetic approach. Objective is to teach any student how to analyze any film by using the various analytical methods outlined in the book.
