Ecological Design to Shape New Urbanities - University of ...

proposed to monitor >250,000 individual plants with stem diameter 1 cm within a 50-ha plot on BCI. This was a significant departure from the customary 1,000 plants 5 cm in diameter in 1-ha plots. Predictably, such an audacious proposition faced resistance from the U.S. National Science Foundation. Any suggestion to increase

Climate Change and Land

Currently, 25- 30% of total food produced is lost or wasted (medium confidence). These factors are associated with additional GHG emissions (high confidence). Changes in consumption patterns have contributed to about 2 billion adults now being overweight or obese (high confidence). An estimated 821 million people are still undernourished (high ...
