Principles of Yacht Design Lars Larsson
2022-03-17 Principles of

Yacht Design has established itself as the standard book on the subject for practising

designers, naval architecture students, discerning boat owners as well as the boatbuilding industry as a whole. The fifth edition is completely revised and expanded. It examines every aspect of the process of yacht and powerboat design. The new edition includes new findings from recent research in aero and hydrodynamics, as well as covering the most recent changes to building standards. The authors have used a newly built 41-foot performance cruiser to demonstrate the practical application of yacht design theory. This new edition includes photos of the building process and detailed explanations.

Hunting and Fishing in the New South Scott E. Giltner 2008-10-29 This innovative study re-examines the dynamics of race relations in the

post--Civil War South from an altogether fresh perspective: field sports. In the late nineteenth and early twentieth centuries, wealthy white men from Southern cities and the industrial North traveled to the hunting and fishing lodges of the old Confederacy -- escaping from the office to socialize among like-minded peers. These sportsmen depended on local black guides who knew the land and fishing holes and could ensure a successful outing. For whites, the ability to hunt and fish freely and employ black laborers became a conspicuous display of their wealth and social standing. But hunting and fishing had been a way of life for all Southerners -- blacks included -- since colonial times. After the war, African Americans used their

mastery of these sports to enter into market activities normally denied people of color, thereby becoming more economically independent from their white employers. Whites came to view black participation in hunting and fishing as a serious threat to the South's labor system. Scott E. Giltner shows how African-American freedom developed in this racially tense environment -- how blacks' sense of competence and authority flourished in a Jim Crow setting. Giltner's thorough research using slave narratives, sportsmen's recollections, records of fish and game clubs, and sporting periodicals offers a unique perspective on the African-American struggle for independence from the end of the Civil War to

the 1920s. -- Stephen A. West

Be My Guest Conrad Nicholson Hilton 1957
The Kevin Show Mary Pilon 2018-03-06 From the New York Times bestselling author of *The Monopolists*, the "fascinating" (People) story of Olympian Kevin

Hall and the syndrome that makes him believe he stars in a television show of his life. Meet Kevin Hall: brother, son, husband, father, and Olympic sailor. Kevin has an Ivy League degree, a winning smile, and throughout his adult life, he has been engaged in an ongoing battle with a person that doesn't exist to anyone but him: the Director. In the tradition of Kay Redfield Jamison's *An Unquiet Mind*, journalist and NYT bestselling author Mary Pilon's *The Kevin Show* reveals the many-sided struggle--of Kevin, his family, and the medical profession--to understand and treat a psychiatric disorder whose euphoric highs and creative ties to pop culture have become inextricable from Kevin's experience of himself. Kevin suffers from what doctors are

beginning to call the "Truman Show" delusion, a form of bipolar disorder named for the 1998 movie in which the main character realizes he is the star of a reality TV show. When the Director commands Kevin to do things, the results often lead to handcuffs, hospitalization, or both. Once he nearly drove a car into Boston Harbor. His girlfriend, now wife, was in the passenger seat. Interweaving Kevin's perspective--including excerpts from his journals and sketches--with police reports, medical records, and interviews with those who were present at key moments in his life, *The Kevin Show* is a bracing, suspenseful, and eye-opening view of the role that mental health plays in a seemingly ordinary life.

Making Sense of Messages

Mark Stoner 2015-10-16
Using a developmental approach to the process of criticism, *Making Sense of Messages* serves as an introduction to rhetorical criticism for communication majors. The text employs models of criticism to offer pointed and reflective commentary on the thinking process used to apply theory to a message. This developmental/apprenticeship approach helps students understand the thinking process behind critical analysis and aids in critical writing.

the world of Disney. Aboard the Disney Cruise Line's inaugural passage through the new Panama Canal, the Keepers and their holograms uncover a puzzle hidden within the pages of a stolen journal. The point of that puzzle will reveal itself in the caves of Aruba, the zip lines of Costa Rica, and the jungles of Mexico. A destructive force, dormant for decades, is about to be unleashed. The five Kingdom Keepers are to be its first victims! Includes a preview chapter from *Kingdom Keepers VII - The Insider!*

Mobile Unleashed Don Dinee 2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today.

This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other

semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be "collaboration." Throughout this story,

from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history. *Closing of the American Mind* Allan Bloom
2008-06-30 The

brilliant, controversial, bestselling critique of American culture that “hits with the approximate force and effect of electroshock therapy” (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that “hits with the approximate force and effect of electroshock therapy” (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous

narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom's argument caused such a furor at publication and why our culture so deeply resists its truths today.

Backstage Leadership

Charles Galunic

2020-06-10 Most of us would recognize a star leader by their charisma, emotional intelligence and public communication prowess. What is truly impressive but often overlooked is the silent work of leadership that garners real results. Exercising influence in a complex and global organization – whilst also shaping and executing strategies across borders in a disruptive age – is the

true mark of success as a leader. *Backstage Leadership* takes a comprehensive look at the background processes that leaders must master in order to shape the culture, direction and capability of a successful company. With an emphasis on strategy, the author provides an integrated toolkit for developing your knowledge and skills as a 'backstage leader.' You will learn how to: Mobilize people towards new strategic directions Scan your business environment for threats and disruptive forces Diagnose and help to shape the culture of your organization Develop talent and capabilities towards a specific goal. Focusing on the key and consistent underlying processes of leadership, this book is essential reading for managers who wish to bring focus and

coherence to their leadership role and integrate themselves within the engine of the organization.

Sailing on the Edge Bob Fisher 2013 Provides a comprehensive, behind-the-scenes look at the America's Cup race, tracing its history, skippers and their teams, and includes information on the science behind the ship building.

America's Cup Race Courses for the First Seven Matches Ryoichi Tsuchiya 2019-11 This is a chart measuring 35" x 20" of the race courses of the America's Cup matches from 1870-1887 in New York Harbor and Bay and vicinity.

Interpretation James Nolan 2012-10-09 In recent decades the explosive growth of globalization and regional integration has fuelled parallel growth in multilingual

conferences. Although conference interpreting has come of age as a profession, interpreter training programs have had varied success, pointing to the need for an instructional manual which covers the subject comprehensively. This book seeks to fill that need by providing a structured syllabus and an overview of interpretation accompanied by exercises in various aspects of the art. It is meant to serve as a practical guide for interpreters and as a complement to interpreter training programs in the classroom and online, particularly those for students preparing for conference interpreting in international governmental and business settings. This expanded second edition includes additional exercises and provides direct links to a

variety of web-based resources and practice speeches, also including additional language combinations.

Racecraft Barbara J. Fields 2022-02-01 A new edition of a celebrated contemporary work on race and racism Praised by a wide variety of people from Ta-Nehisi Coates to Zadie Smith, *Racecraft* "ought to be positioned," as Bookforum put it, "at the center of any discussion of race in American life." Most people assume racism grows from a perception of human difference: the fact of race gives rise to the practice of racism. Sociologist Karen E. Fields and historian Barbara J. Fields argue otherwise: the practice of racism produces the illusion of race, through what they call "racecraft." And this phenomenon is intimately entwined with

other forms of inequality in American life. So pervasive are the devices of racecraft in American history, economic doctrine, politics, and everyday thinking that the presence of racecraft itself goes unnoticed. That the promised post-racial age has not dawned, the authors argue, reflects the failure of Americans to develop a legitimate language for thinking about and discussing inequality. That failure should worry everyone who cares about democratic institutions.

Principles of Marketing

Winging It Diane Swintal
2013-12-31 "The design and tactical battles that led to the most exciting America's Cup in history are laid out in meticulous detail in *Winging It: Oracle Team*

USA's Incredible Comeback to Defend The America's Cup. Written by three veteran sailing journalists, *Winging It* provides an insider's look at the professional sailing business and the America's Cup, from how the 72-foot cats became the boat of choice – one early requirement: They had to be able to be disassembled and transported in standard shipping containers – to the design modifications Oracle made in the later stages of the series to bounce back from an 8:1 deficit and retain the Cup (not much besides some minor tinkering with the rudder)." - Forbes "Whether you are a casual fan or a die-hard America's Cup follower, you're likely to enjoy *Winging It*. The three authors—all accredited journalists who spent many, many hours in the America's Cup Media Center—will

take you from the origins of the America's Cup in 1851 all the way through Oracle Team USA's incredible comeback in San Francisco in September 2013." -

CupExperience.com "Winging It holds a place on my bookshelf that is within easy reach. It has become the go-to book on the 34th America's Cup as a means of quickly checking a fact, or time sequence or some aspect of the Cup that has become a little fuzzy even after this short passage of time. It should have a place in everyone's laptop kitbag, either as a quick read in a spare moment, or as a serious reference." -Sail-World.com A miracle on the water Millions of sailing enthusiasts and casual fans alike watched the America's Cup in awe as the ORACLE TEAM USA trailing one

point to New Zealand's eight, was first to the finish line in eight consecutive races. This miracle triumph left many wondering "How did they do it?" The answers come together in *Winging It*, with insights from naval architects and builders on their radical boat designs, the consequences of racing these untested boats, and explanations of how the foils and wingsails—rarely seen on boats before—work. The book explores the impact of events that led up to the Cup, including how a sudden capsizing threw the entire event into doubt before the 2013 America's Cup ultimately delivered an epic finale. Top sailors share their stories, including the victorious Jimmy Spithill on USA 17 and the shockingly defeated ETNZ skipper Dean Barker. This is the story of an historic win

that goes beyond the emotions of the day to explain how the many months of innovation, research, trials, and failures helped secure the Cup in the final race on September 25.

The Billionaire and the Mechanic Julian Guthrie 2014-04-01 Expanded to include the behind-the-scenes story of the 34th America's Cup and Team USA's incredible comeback Down eight-to-one in the 34th America's Cup in September 2013, Oracle Team USA pulled off a comeback for the ages, with eight straight wins against Emirates Team New Zealand. Julian Guthrie's The Billionaire and the Mechanic tells the incredible story of how a car mechanic and one of the world's richest men teamed up to win the world's greatest race. With a lengthy new section on the 34th America's Cup, Guthrie also shows how they did it again. The America's Cup, first awarded in 1851, is the oldest trophy in international sports. In 2000, Larry

Ellison, co-founder and billionaire CEO of Oracle Corporation, decided to run for the prize and found an unlikely partner in Norbert Bajurin, a car mechanic and Commodore of the blue-collar Golden Gate Yacht Club. After unsuccessful runs for the Cup in 2003 and 2007, they won for the first time in 2010. With unparalleled access to Ellison and his team, Guthrie takes readers inside the building process of these astonishing boats and the lives of the athletes who race them and throws readers into exhilarating races from Australia to Valencia. The Capitalism Papers Jerry Mander 2013-05-01 In the vein of his bestseller, Four Arguments for the Elimination of Television, nationally recognized social critic Jerry Mander researches,

discusses, and exposes the momentous and unsolvable environmental and social problem of capitalism. Mander argues that capitalism is no longer a viable system: "What may have worked in 1900 is calamitous in 2010." Capitalism, utterly dependent on never-ending economic growth, is an impossible absurdity on a finite planet with limited resources. Climate change, together with global food, water, and resource shortages, are only the start. Mander draws attention to capitalism's obsessive need to dominate and undermine democracy, as well as to diminish social and economic equity. Designed to operate free of "morality," the system promotes "permanent war" as a key economic strategy. Worst of all, the problems of

capitalism are intrinsic to the form. Many organizations are already anticipating the breakdown of the system and are working to define new hierarchies of democratic values that respect the carrying capacities of the planet.

Spanning 25 years of serious writing on hip-hop by noted scholars and mainstream journalists, this comprehensive anthology includes observations and critiques on groundbreaking hip-hop recordings.

Learning to Fly Roger Vaughan 2020-11-15
Learning to Fly provides a missing piece of America's Cup history that bridges the gap between 156 years of monohulls sailing for the Cup, and the hi-tech craft that are now foiling for the Cup. San

Diego's successful defense of the Cup in 1988 was sailed in a multihull, which set a precedent for using that type of boat, but 2010 was the very first time two multihulls had squared off for an America's Cup match. Learning to Fly reveals the drama involving the design, construction, and sailing of a huge, temperamental multihull driven by an enormous wingsail. It sets the stage for the America's Cup match in March, 2021.

Partnership for the Americas: Western Hemisphere Strategy and U.S. Southern Command

James G. Stavridis 2014-02 Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership

responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command.

Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch "ideas not missiles" into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

Paris to the Moon Adam Gopnik 2001-12-18 Paris. The name alone conjures

images of chestnut-lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank

café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning "Paris Journals" in The New Yorker know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a "culinary

crisis." As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. "We went to Paris for a sentimental reeducation-I did anyway-even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education."

Homo Deus Yuval Noah Harari 2017-02-21

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style--thorough, yet riveting--famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the

first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental

questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

The Summer My Father Died dit Kiss 2012-09-03 dit Kiss grew up a communist in Budapest, soaking up her father's ideology

unquestioningly. As a child she is puzzled when others refer to her as Jewish; she only knows that her family doesn't believe in God. How can they? As her father lies dying, dit tries to understand the enigma surrounding his life. Where does his unshakeable communist conviction come from? Why doesn't he have relatives? As she digs deeper into his tragic history, dit is forced to confront the contradictions and lies woven into the life of her family - and her country - through the dramatic twists of twentieth century Hungary. 'Lyrical and poetic The Summer My Father Died is a powerful memoir. In this remarkable memoir, dit Kiss uncovers the paternal history that shaped her own, even while she was unaware of it ... the journey is

riveting.' Lisa Appignanesi 'It shook me profoundly ... not only the richness of the relationship between father and daughter, but the internal development of the narrator also had a deep impact on me.' István Szabó, director of Mephisto and Being Julia.

The Shock Doctrine Naomi Klein 2010-04-01 The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again,

this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on

crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

Afropolitan Horizons Ulf Hannerz 2022-02-11

Nigeria is a country shaped by internal diversity and transnational connections, past and present. Leading Nigerian writers from Chinua Achebe, Amos Tutuola and Wole Soyinka to Chimamanda Ngozi Adichie and Teju Cole have portrayed these Nigerian issues, and have also written about some of the momentous events in Nigerian history. *Afropolitan Horizons* discusses their work alongside other novelists and commentators, as well as describing the ways in

which Nigeria has appeared in foreign news reporting. It is all interwoven with the author's own anthropological field research in a town in Central Nigeria.

50 Economics Ideas You Really Need to Know

Edmund Conway 2013-11-05

What exactly is a credit crunch? Why do professional athletes earn so much more than the rest of us? Which country is likely to be the world's leading economy in ten years'

time? Daily Telegraph economics editor Edmund Conway introduces and explains the central ideas of economics in a series of 50 essays. Beginning with an exploration of the basic theories, such as Adam Smith's "invisible hand," and concluding with the latest research into the links between wealth and happiness, he sheds light on all the essential topics needed to understand booms and busts, bulls and bears, and the way the world really works.

Dispute Resolution in the 34th America's Cup

Henry Peter 2015-11-24

The America's Cup continues to evolve as the preeminent sporting contest in the world of sailing and is one of the greatest contests in the world of sport. In its long and colorful history, disputes around the match have not only added major extra

publicity to the event's great popular appeal but also spawned a wealth of judicial and arbitral decisions that have become influential on the sport of sailing. This book - continuing the tradition of Kluwer Law International's earlier publications on the 31st, 32nd, and 33rd America's Cup - offers richly detailed expert commentary (along with the decision texts themselves) on the judgments of various courts and other dispute resolution bodies delivered during the tumultuous 34th America's Cup. Since there is no official record of many of these documents, this book is the only source that presents them together in a single volume, with the added benefit of commentary. Among the aspects covered are the following: - all decisions issued by the

34th America's Cup International Jury, as well as related decisions or awards rendered by other bodies (ISAF Disciplinary Commission, ISAF Review Board and the Court of Arbitration for Sport); - judgments of the New York Supreme Court and its Appellate Division regarding the rejection of the African Diaspora Maritime Corporation application to compete to be a defender; - the pivotal Jury decision affirming that the AC72 yacht could be made to foil on its centreboards and rudders, dramatically increasing its speed; - the first-time-ever Youth America's Cup; and - the extensive mediation concerning safety recommendations following the death of a sailor. A general introduction surveys the most important and peculiar issues

pertaining to the event. Written not only as a comprehensive legal record of the 34th America's Cup but also with a view to favor future matches and to limit the possibilities of new controversies, the book takes a significant step toward ensuring that disputes are dealt with by arbitration and not by lengthy, costly, and uncertain state court proceedings. In this way the book provides invaluable guidance for trustees, competitors, and event officials, not only for the America's Cup but by extension to other major international sporting events.

In the stirring, highly anticipated first volume of his presidential memoirs, Barack Obama tells the story of his improbable odyssey from young man searching for his identity to leader of the free world, describing in strikingly personal detail both his political education and the landmark moments of the first term of his historic presidency—a time of dramatic transformation and turmoil. Obama takes readers on a compelling journey from his earliest political aspirations to the pivotal Iowa caucus victory that demonstrated the power of grassroots activism to the watershed night of November 4, 2008, when he was elected 44th

president of the United States, becoming the first African American to hold the nation's highest office. Reflecting on the presidency, he offers a unique and thoughtful exploration of both the awesome reach and the limits of presidential power, as well as singular insights into the dynamics of U.S. partisan politics and international diplomacy. Obama brings readers inside the Oval Office and the White House Situation Room, and to Moscow, Cairo, Beijing, and points beyond. We are privy to his thoughts as he assembles his cabinet, wrestles with a global financial crisis, takes the measure of Vladimir Putin, overcomes seemingly insurmountable odds to secure passage of the Affordable Care Act, clashes with generals about U.S.

strategy in Afghanistan, tackles Wall Street reform, responds to the devastating Deepwater Horizon blowout, and authorizes Operation Neptune's Spear, which leads to the death of Osama bin Laden. A Promised Land is extraordinarily intimate and introspective—the story of one man's bet with history, the faith of a community organizer tested on the world stage. Obama is candid about the balancing act of running for office as a Black American, bearing the expectations of a generation buoyed by messages of "hope and change," and meeting the moral challenges of high-stakes decision-making. He is frank about the forces that opposed him at home and abroad, open about how living in the White House affected his wife and daughters, and unafraid to reveal self-

doubt and disappointment. Yet he never wavers from his belief that inside the great, ongoing American experiment, progress is always possible. This beautifully written and powerful book captures Barack Obama's conviction that democracy is not a gift from on high but something founded on empathy and common understanding and built together, day by day.

Never Let a Serious Crisis Go to Waste
Philip Mirowski
2014-04-15 At the onset of the Great Recession, as house prices sank and joblessness soared, many commentators concluded that the economic convictions behind the disaster would now be consigned to history. Yet in the harsh light

of a new day, attacks against government intervention and the global drive for austerity are as strong as ever. Never Let a Serious Crisis Go to Waste is the definitive account of the wreckage of what passes for economic thought, and how neoliberal ideas were used to solve the very crisis they had created. Now updated with a new afterword, Philip Mirowski's sharp and witty work provides a roadmap for those looking to escape today's misguided economic dogma.

The Story of the America's Cup Ranulf Rayner 2014-05 A wonderfully illustrated history of the world's most prestigious yacht race for anyone passionate about the sea and sailing.
