Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health

outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Dionysus and Politics Filip Doroszewski 2021-05-30 This volume presents an essential but underestimated role that Dionysus played in Greek and Roman political thought. Written by an interdisciplinary team of scholars, the volume covers the period from archaic Greece to the late Roman Empire. The reader can observe how ideas and political themes rooted in Greek classical thought were continued, adapted and developed over the course of history. The authors (including four leading experts in the field: Cornelia Isler-Kerényi, Jean-Marie Pailler, Richard Seaford and Richard Stoneman) reconstruct the political significance of Dionysus by examining different types of evidence: historiography, poetry, coins, epigraphy, art and philosophy. They discuss the place of the god in Greek city-state politics, explore the long tradition of imitating Dionysus that ancient leaders, from Alexander the Great to the Roman emperors, manifested in various ways, and shows how the political role of Dionysus was reflected in Orphism and Neoplatonist philosophy. Dionysus and

Politics provides an excellent introduction to a fundamental feature of ancient political thought which until now has been largely neglected by mainstream academia. The book will be an invaluable resource to students and scholars interested in ancient politics and religion.

The Model Wife Tricia Stringer 2019-10-01 Even a good woman can be pushed too far...From bestselling author Tricia Stringer, this beautifully realised multi-generational family story looks at what happens when real-life betrayals and struggling relationships clash with outdated ideas of what a woman should be. Natalie King's life is full. Some might say too full. With her teaching job, a farm to run, three grown daughters who have not quite got a handle on things, a reserved husband and a demanding mother-in-law, most days she is too busy to think about whether she is happy. But her life has meaning, doesn't it? After all, she is the one person everyone depends upon. But when an odd gift from her mother-in-law - an old book in the form of stern and outdated advice for young wives - surfaces again, it brings with it memories she thought she had buried deep. Has this insidious little book exerted some kind of hold over her? Could it be that in her attempts to be a loving wife and mother, she no longer knows who she is? On a day when it seems everyone is taking her for granted, and as the ghost of a past betrayal rises, it becomes clear that even this good mother and model wife can be pushed too far ...

Freshwater Fisheries Management Robin G. Templeton

1995-03-02 The new edition of this widely successful text continues to offer a wealth of essential information and practical guidance for all involved in freshwater fisheries management in temperate regions. Whilst the whole text has been fully revised and many sections have been completely rewritten to cover the many advances and developments of the last decade, the clarity of presentation and accessibility of style, hallmarks of the previous edition, are retained. Once more, the text is primarily concerned with the British Isles. However, the principles described and examples given are widely applicable in many other countries.

The Engaged Sociologist Kathleen Odell Korgen 2014-09-23 This fully updated edition of *The Engaged Sociologist* by Kathleen Odell Korgen carries the public sociology movement into the classroom, while at the same time providing an engaging overview of the entire field. It demonstrates how to think sociologically, to develop a sociological eye, and to use sociological tools to become effective participants in a democratic society. Perfect as a supplement for an introductory course, or as a main text for any course that has public sociology at its roots, this inspiring book will serve as a guidebook to any student who is passionate about applying sociological concepts to the world around them.

Hydromania Stephen Shepperd 2013-10-01 Coeur d'Alene's love/hate relationship with boat racing is at the center of this comprehensive history of the Diamond Cup race for unlimited hydroplanes. The early origins of competitive boat racing on Coeur d'Alene Lake, the backstory of the how the small lakeside community came to host ten years of the Diamond Cup, the true story of the civil disturbances that would cast a lasting pawl on the event, the real reasons behind the decision to stop hosting the races, and the drama and controversy that led to the races being banned from the city are all covered in depth. The stories of the civic leaders, race volunteers, boat owners, drivers, and other key individuals that came together to put on the exciting spectacle

that was the Diamond Cup are lovingly recounted. Of interest to boat racing fans and those curious about one of the premier sporting events in the history of North Idaho. Illustrated with over 100 photographs.

Scars, Marks & Tattoos Jacqueline Caruso 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Motorized Obsessions Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that

wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's

compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
