Light from the East. Papyrologische Kommentare Zum Neuen Testament Peter Arzt-Grabner 2010 The papers in this book provide a good introduction to the purpose and scope of the PKNT project. The PKNT commentaries function as original and innovative supplements to traditional biblical commentaries. -- Scott Charlesworth, Pacific Adventist University, Review of Biblical Literature Seit 15 Jahren werden die Papyrologischen Kommentare zum Neuen Testament (PKNT) vom Osterreichischen Wissenschaftsfonds FWF durch Forschungsprojekte an der Universitat Salzburg gefordert. Aus diesem Anlass fand im Dezember 2009 ein internationales Symposium statt, an dem Papyrologen, Bibelwissenschaftler, Klassische Philologen, Anthropologen und Rechtshistoriker aus den USA, aus

Kanada, Italien, Deutschland und Österreich teilnahmen. Im Zentrum der Papyrologischen Kommentare stehen Papyri, beschriebene Tonscherben, Holz- und Wachstafelchen aus dem griechisch-romischen Alltag, die die Sprache, die Textsorten, die Themen, die zeitgeschichtliche und soziale Situation biblischer Texte beleuchten. Die in dem von Peter Arzt-Grabner und Christina M. Kreinecker herausgegebenen Band vorgelegten Beiträge widmen sich einzelnen Texten des Alten und Neuen Testaments (Genesis, Johannesevangelium, Paulusbriefe) und behandeln übergreifende Themen wie die antike Sklaverei, das Hirtenwesen, die Autorschaft und Überlieferungsgeschichte paulinischer Briefe, das Textilhandwerk, die Ausbildung von

Lehrlingen, die Heiligenverehrung, die Übersetzung der Hebräischen Bibel und die frühchristliche Liturgie. Since more than 15 years, research projects entitled Papyrological Commentaries on the New Testament (PKNT) are sponsored by the Austrian Science Fund FWF. In December 2009 a symposium was held at the University of Salzburg where papyrologists, biblical scholars, scholars of classics, anthropology, and ancient law from the US, from Canada, Italy, Germany, and Austria met to present their papers. The Papyrological Commentaries focus on documentary papyri, ostraca, as well as wooden and waxed tablets from Greco-Roman times that illuminate language, genre, topics, and the social and political situation of biblical texts. The papers of this volume

edited by Peter Arzt-Grabner and Christina M. Kreinecker deal with specific texts of the Old and New Testament (Genesis, Gospel of John, Pauline Letters) and are concerned with ancient slavery; the world of shepherds, weavers, and apprentices; the tradition and compilation of Pauline letters; the veneration of saints; the translation of the Hebrew Bible; and early Christian liturgy.

The Scientific Attitude Lee McIntyre
2019-05-07 An argument that what makes science distinctive is its emphasis on evidence and scientists' willingness to change theories on the basis of new evidence. Attacks on

science have become commonplace. Claims that climate change isn't settled science, that evolution is "only a theory," and that scientists are conspiring to keep the truth about vaccines from the public are staples of some politicians' rhetorical repertoire. Defenders of science often point to its discoveries (penicillin! relativity!) without explaining exactly why scientific claims are superior. In this book, Lee McIntyre argues that what distinguishes science from its rivals is what he calls "the scientific attitude"—caring about evidence and being willing to change theories on the basis of new evidence. The history of science is littered with theories that were scientific but turned out to be wrong; the scientific attitude

reveals why even a failed theory can help us to understand what is special about science. McIntyre offers examples that illustrate both scientific success (a reduction in childbed fever in the nineteenth century) and failure (the flawed "discovery" of cold fusion in the twentieth century). He describes the transformation of medicine from a practice based largely on hunches into a science based on evidence; considers scientific fraud; examines the positions of ideology-driven denialists, pseudoscientists, and "skeptics" who reject scientific findings; and argues that social science, no less than natural science, should embrace the scientific attitude. McIntyre argues that the scientific attitude—the grounding of science in

evidence—offers a uniquely powerful tool in the defense of science.
